C-FORCE No.8 B AUGUST 1993

HERE ARE

I don't know, I turn my back for just five minutes...

Having been whisked away to our special 'Top Secret Projects' department for most of the month, I left the general running of the mag to my trusted deputy, James. We'd already discussed what was to go into the issue, all that was left for Big Jim to do was put it together!

The next thing I know, on emerging from the secure unit of Impact Towers, is that I've got a minor rebellion on my hands. The Tipster, usually such a mild-mannered individual, has been tearing about the place sporting an assortment of sharp objects and a face like thunder, while our man of letters Mr Mangram is refusing to come out of the post room! He's tricky enough to comprehend at the best of times, what with that bag on his head and all, but barricaded into a six by eight-foot windowless cubby hole it was simply impossible to understand his demands, let alone comply with any of 'em. What the hoola-hoop is going on, then? Well, quite simply this: pages. James wanted to 'cram as much into the ish as possible, it seems, and to do so it became necessary to lop a couple of pages from various sections of the mag. As a result, The Tipster found himself with more tips than he could use, and a few of Lloyd's letters wound up on the cutting room floor... Ah well, ego's have now been massaged and tempers tamed, so it'll be business as usual again next month (I hope). Meanwhile, I hope you enjoy the issue - and the cover cassettes! Judging by the sales figures for the last issue, our policy of bringing you the very best free games is really paying off...

May The Force Be With You,

Steve Shields Managing Editor

ally again! It's me - Ben the Bollin, back with an armful of phones and numbers. This month, I've declare to up) for a more eyebraw-raising lopic, Instead of vating for your favourité game to be covered in the tips pages. I thought you might like to make an even more important decision for COMMODORE FORCE

As you'll notice, there's a special PD games review this month. The question is, would you like to see more PD game reviews in addition to Remi Ebus' regular slot? Make your vote count and phone one of the following numbers

YES, MORE PD GAMES REVIEWS PLEASE -0839 007 885 6 NO, NEVER again — 0839 007 886

TWO BIG BOXES

s well as being one of the best compilations ever, Big Box 2 is one of the best compilations ever. This, combined with the fact that Big Box 2 is one of the best compilations ever, would suggest that Big Box 2 is, indeed, one of the best compilations ever. Obviously, you agree — there were a veritable plethora of entries. The people that actually win one of the ten available copies, are:

Andrew Holohan (Leeds), Lynda Bloomfield (Warks), Gus McTiernan (Purley), Vicky Hallwood (Chesire), Carl Ward (Berkshire), Julia Mudd (Dundee), Mr S R Comish (Cambs), Joseph Lowery (Essex), Gavin Samson (Hants), Jemma Payne (Kent).

ATLANTIS SUNK

ike the mythical city from which it take it's name. Atlantis Software has disappeared beneath the waves — in other words, it's gone bust. Unlike the tabled city though, there's at least one survivor — Sceptre of Baghdad Reviewed in Issue Three, it's been snapped up by Kenz of Binary Zone PD, for release on his Psytroniks Software label, a new budget publisher dedicated to the good old '64,

The Psytroniks version of Sceptre will include a changed main sprite, enhanced graphics, better presentation and more music. Our main complaint about the game in its Atlantis incarnation was the absurdly illogical nature of the problems, but only time will tell if this particular flaw is amended. In the meantime, good luck to Kenz with his new labell.

(Wolverhampton), Trevor Frich (Shropshire), G. Heppinstall (Oxon): Jonethan Cullen (keland). Darren Boland (Ireland), Nick Berrow (Oxon), Michael Russell (Liverpool), Manhew Egerion (Nonhwich), Denis Lymar (Ireland), Stuart Williams (Somerson), Jonathan Putterson (London), Stuart Scattergood (Chlyd), Pairick Lockhart (Ni (reland), M.P. Thornton (Lancashire), James Dalton (Co Kildara), Colin McGongléy (Cheshire), Philip Salter (West Susser), Miss & Southwick (W Midlands), Childophar Pampolon (Walsall), Alan Perks (Tyne & Wear), Darren Gilbert (Notlingnam), Mr Gary Bratherica (Sinks on-Trem), A Burlon (Lines), H Crassey. (M Humberside), F Condon (Irelann), Lestie Bray (Donossier), R Springer (Claumann) James Donrani (Eurisik), M Crecket (W Glambigari) A. J. Boden (Devon) David Walker. (Warks), Paul Alimin (Wales) Glenn Whithouse (Manchester), David Entile (Westlord), Gary Sowerpy (Cumbrial Brian) Sunmon (Hutti

SEYMOUR WITH IT

hen it comes to artistic talent, it would appear that you lot aren't exactly tacking. In this excellent comp. CodeMasters were oftening a Casio TV for one lucky reader, and Seymour compilations for ten runners up.

The winners are:

Casio TV Winner

Damien Doyle (N. tretand)

Ten Runners Up — Seymour compilations

J Button (Suffolk), Jason Skyner (N Devon), Miss L Cooper (Cumbria), Paul Austin (S Glam), Ellen Jones (Wes! Midlands)

Steven Bond (Worcester), Paul Hannon (Ireland), Richard Beckett (York), Matthew Hanlin (Devon), Daniel Fox

(S Yorks)

yae of chira

et's face it, lew people can write amusing captions. However, Chris (who leaped at the chance of judging this comp) was literally rolling around the office with laughter — no, really he was...

That aside, the winning caption was. we're not going to tell you. We're going to wait until there's another Golfing game so we can use it for curselves."

Anyway, the overall winner is L Bloomfield from Warks with the following ten readers each to receive a copy of Nick Falda's Chempionship Golf as runners up prizes.

Brian Woolson (Cambs), David McGregor (Spotland), Mntthew Sullivan (Essay), Alasdair Young (Clwyd), Gareth Jones (Northampion), Andrew Boltver (Bigningham), Mr G Ross (London), Dean Moore (5 Glam), G C Stanton (St. Helens), Mark Pilgrim (Lincolnehirs)

Probably

STEVE SHIELDS

Like I said in my Editori column, this month has seen me spirited away to impact's maximum security Special Projects Dept to

contribute to Top Secret Project No. 6735/G7b. I wasn't going without a struggle, though, and mercifully lan managed to slip me C64, power pack, datasette recorder, joystick, monitor and a couple of games before the amour-plated security droid arrived to lead me away. My smuggled system came in very handy, loo (it can get reet lonely locked away behind 12 feet of reinforced concrete), and The Incredible Shrinking Sphere kept me merrily amused through the long nights...

JAMES PRICE

This month I've been neppily beavering away at a Cadbury's Carame — sorry. I mean Robocod. This issue's covertapes have also attracted the twitching

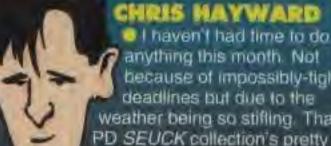

fingers of the team and myself; it's a miracle we've got any work done!

IAN OSBORNE

Who says all SFUCK games look the same? Binary Zone's Ali Yngve Collection just goes to show what you can do with a little patience and lot of talent!

On the commercial front, check out MicroProse/Kixx's Acrojet — an aging but fun flight sim.

because of impossibly-tight deadlines but due to the weather being so stifling. That PD SEUCK collection's pretty hit too — the sun seems to bring out the best in everything.

MILES GUTTERY

hard earned readles Rick Dangerous 2 is the pick of this month's pile — and they say kids have no heroes to look up to these days. Everybody now —

Rick, Rick, he's our man, if anyone can do it. Ricky can! Yeah, right on

GAMES ARE BEING PLAYED... BUT BY WHOM?

WINADRE.

Later this year one of our readers will be invited to go on a holiday of a lifetime - to just about anywhere in the world. It could see you basking in the Bahamas, or cruising in the Caribbean. It could be ambling around Australia, or night-clubbing in New York. Even trekking in Tibet, or pottering around the Pyramids. Literally, the world is your pyster! It could be a holiday for one. Or for a whole family. Just as you wish - providing the total cost comes to no more than £3,000. How do you go about winning such a fantastic invitation? Simply by completing

the coupon opposite and handing it in to

your newsagent. He will then enter it for

this unique competition, in time for the draw which will take place on July 12.

If you win you will be asked to select the holiday of your choice from any you see on offer – either nationally advertised or available from your local travel agent. There will be absolutely no restriction on the location, or the company you choose

It will be entirely up to you to decide which is the right holiday to suit your tastes.

And that's not all. As a thank you to your own newsagent, we will also be sending him two free tickets for a fabulous holiday in Paris, staying at a top hotel, going on a grand

sightseeing tour and taking in a spectacular show at an exotic night club!

ACORN - One of Britain's longest-running computer magazines. Acom Computing (£2.95) is the pre-eminent choice for users of the Archimedes and BBC Micro.

COMMODORE - Three magazines serve the dedicated Amiga Traternity. For games players there is Amigo Action (£3.95) and Amiga Force (£1.95), while Amiga Computing (£2.99) covers every aspect of this versaule machine. Owners of the C64 will find all they need in Commodore Force (£2.95).

ATARI - For the Acari ST enthusiast there are three magazines - ST Action (£3.95) for gamers, with Aton ST User (£.3.40) and Atori ST Review (£3.50) satisfying the more general ST owner.

NINTENDO - The whole of the ever-expanding Nintendo scene is covered by N-Force (£.1.95), while dedicated fans of the Super NES have Super Action (99p) and for Game Boy freaks there's GB Action (99p).

PC - Most dynamic newcomer on the PC magazine scene is PC Home (£3.95), covering both business and leisure interests. PC Today (£3.95) is devoted to supplying practical solutions for the small businessman.

SEGA - All the Sega games machines have their champion in Sego Force (£1.95), with Mega Action (99p) serving the needs of Mega Drive owners (to be launched on May 20).

I wish to place a regular order for the magazine(s) I have ticked below: Please enter this form in the Europress Dream Holiday Competition

GROUP OF COMPANIES

The time has come. Moon and stars are in alignment.

An uneasy calm descends upon the land, and it's Reel. The most gobsmackingly awesome chunk of Reel Action ever conceived is about to be unleashed, and it's taking no prisoners...

If you want your Reel Action without your real tape-loading hassies, and you happen to be one of those lucky peeps in posession of a disk drive then listen up:

Send a £1,49 to

Ablex Audio Video Ltd Harcourt Halesfield 14 Telford Shropshire TF7 40R

Seems simple? Well, there's a couple of other things, actually. Remember to include your name and address, say which issue's games you want (that's one specific issue - no mixing, folks) and finally, don't forget to do the usual things (such as affixing stamps and stuff). Oh yeah - you can get games from older COMMODORE FORCE's too. Just remember the issue (or tape) number.

Beau Jolly

ere's an old 91% er from the days of ZZAP! 64. Colonel Matt Riddley is trapped somewhere in 'Death Run' — a hazardous battle training ground for the Fighter Sphere Corps, and you've gotta get him out! The run consists of a number of levels each divided into four 'plates', one above the other, but you've to watch out for the tiles which disintegrate on impact — each made up of many tiles. Take control of a mighty fighter sphere and head into the perils that await. Not only

must you avoid the many roving assassins on each plate, but you've to watch out for the tiles which disintegrate on impact with the sphere. Not only

does this reduce the space in which to manoeuvr around, but any further contact will result in death Yikes!

So what makes the sphere so incredible? Well because it's capable of altering in size and mass by hitting specific files. Certain situations require the craft to have different properties, will you be small, light and fast, or big, fat and carry hefty inertia? Functions of the various tiles are given in the program - just push the joystick left or right on the title screen. Before each level, you get to

place up to four ammo dumps on the plates. achieved by moving the cursor to your desired spot and pressing fire to drop. the ammo.

ISS is controlled via joystick or keyward

ow who says we don't give you the cream of C64 software? But don't just take our word by it - read the comments of erstwhile Zzantster Julian Rignall, from the game's orginal review:

It's brilliant in all respects. The graphics are fabulous - really colourful with exceptionally cute sprites and great parallax scrolling backdrops. Sound-wise Park Patrol is excellent too, with five boppy tunes and wonderful sound effects creating a perfect almosphere. The gameplay is neal, requiring some nifty joystick work and precision timing if you're going to complete the rubbish collection without falling foul of the many hazards. This must rank as

(fire to change gear) of thesi de milit is to

SPACE Change Con

one of the best budget games ever Miss it and you're missing something really special.

So there you have it! The park's full of rubbish that needs tidying, people drowning in the river need rescuing, and nasty snakes and lurtles have to be disposed of Don't forget to keep an eye on the calorie (energy) meter either - nip into the park but to top if up. Also, an added tip is to check out the trull of the strange plant near the hut; and you thought life as a parkie was dull!

Ganymede. The wall is lined with metal hooks on which have been anchored small objects, so that they will not float about in the absence of gravity. There is an entrance to the airlock set in the ceiling and a door to port leading back to the cold sleep chamber.

There is a bulky spacesuit here. There is a plastic pouch here. There is a two-way radio here.

Dup

You are in the Ganymede's airlock, with the inner door below you and the outer door above you. The inner door is open and the outer door is closed.

Thelp help theres an ergonomic alien out side and he is going to bite my head of should i alhit it with my commodore for ce, or blet him devour my legs

The Guild

he GCC Amistrong, a huge space-hulk has been drifting unlouched for years. The crew's remains lie strewn about the decks, each felling twisted stories of a long-passed nightmare Your mission, is to dock with the ship and find out what happened.

Seasoned adventurers will know what to do and everyone else, well examine everything. Oh, and remember a clean set of undies.

ENJOYING YOURSELF?

If you find that, after playing Starflight for a few weeks, you're desperate for another quality adventure, then perhaps you'd better ge in touch with Tony Collins at The Guild. But what's his address?' I her you cry — non't worry, we're just getting around to that.

The Guild, 760 Tyburn Road, Erdington, Birmingham 824 9NX Remember — you'll be wanting a catalogue, so you must include that all-important SAE.

PD BONANZA

hanks to our Netherlandic buddy, REMI 'PUBLIC ENEMY' EBUS, we're proud to present our very own selection of jumpin' demos to tax the chips of your lucky 64's — so prepare yourself for a barrage of whizzo effects and obscure scrollies. Each of the programs featured are covered in this months PUBLIC SECTOR, but if you can't wait to see what's in store, remember — press space to skip from section to section.

Perplex

Four natty titles are on offer, so load 'em up in the normal way and feast your retinas.

Terminus

John Wells

et a life - an easy life. You can't take the heat of real C64 games action? Well I sipose we, the truly great COMMODORE FORCE gang will help you out with yet another prime portion of good old-lashioned English pokes of the load-in variety.

Il seems some of you are having a little trouble understanding how to use the program, so here's a delimitive 'idiois guide'

- 1. Load the Easy Lives program.
- 2. Use joystick (port 2) to click on the game you wish to cheat with.
- 3. Now click on the attributes you want when the game commences.
- 4. When the message Rewind tape and press play' appears, insert the original copy of the game to be hacked, and the rest, as they say, in history.

Anyway, this month's batch of cheats are:

- Rimrunner
- Barbarian 2
- Ikari Warriors
- Dorkside
- Pac-Land
- Solomons Kley

Beau Jolly

hree grant mutants are ripping up the city with the military desperately frying to stop 'em. Unlike usual beat 'em-ups, you get to control the bad guys — in this instance, the monsters doing the damage. There's Lizzy the lizard, Raight the wolfman and George the ape. Choose your characters and do as much damage to the building ridden screens as possible, whilst avoiding, smashing and eating the myriad of tanks.

Two players can use joysticks with a time player using the following keys:

Wieliens and with

what they are', thought Rick but I'm not sharing my packed lunch with them'.

my Kermit the Frog impression?'. 'I think you look more like Bergerac, actually'.

Kixx,£3.99 Cassette

Not averse to a little exploration himself, MILES 'NO DANGER' GUTTERY pitches in with the greatest explorer of them all. Let the adventure commence...

e's tricky, he's nippy, he's a little bit dippy.
Rick Dangerous, all-round major dude, is back on the scene in his second daring

expedition. After the archaeological antics of his first outing, he returns home to London for an unexpected surprise — the entire city is being attacked by aliens! Spacecraft are circling in the skies and all's not well in the hearts of Englishmen. While pondering the situation for a moment, a laser boll hurtles out of the sky and frazzles Ricky's beloved hat. Angered at this act of malevolence and never one to resist a challenge, the intrepid fellow sets off for Hyde park where the alien's mother-ship has landed, to see off the evil beings.

No sconer does he reach the craft than a barrage of laser fire rains down upon him. Dodging nimbly he finds himself at the foot of a ladder going up, up, and away into the bowels of the vast ship - and there's no turning back.

Anyone familiar with Rick's first game will know exactly what to expect from the follow up, but for the ignorant, let's take a meandering stroll through the swashbuckling world of Mr Richard Dangerous

Rick starts the game equipped with a ray-gun (limited shots) and several electronic detonators (also limited). As well as being used to shoot/blow up aliens they're also useful for triggering and neutralising traps. Take it from me, traps are your main problem. Wandering aliens are easily spotted and can be despatched with a quick blast of the ray-gun. Traps, on the other hand, can be fiendishly cunning in their design. Lasers built into the walls sometimes go unnoticed; unnoticed that

How can anyone possibily late a game such as Alick Dangerous 27 It's trustrating, awkward, needlessly difficult in places—I love it to bits. A limit levourite of mine after it's original release, Rick 2 is a real bargain on budget.

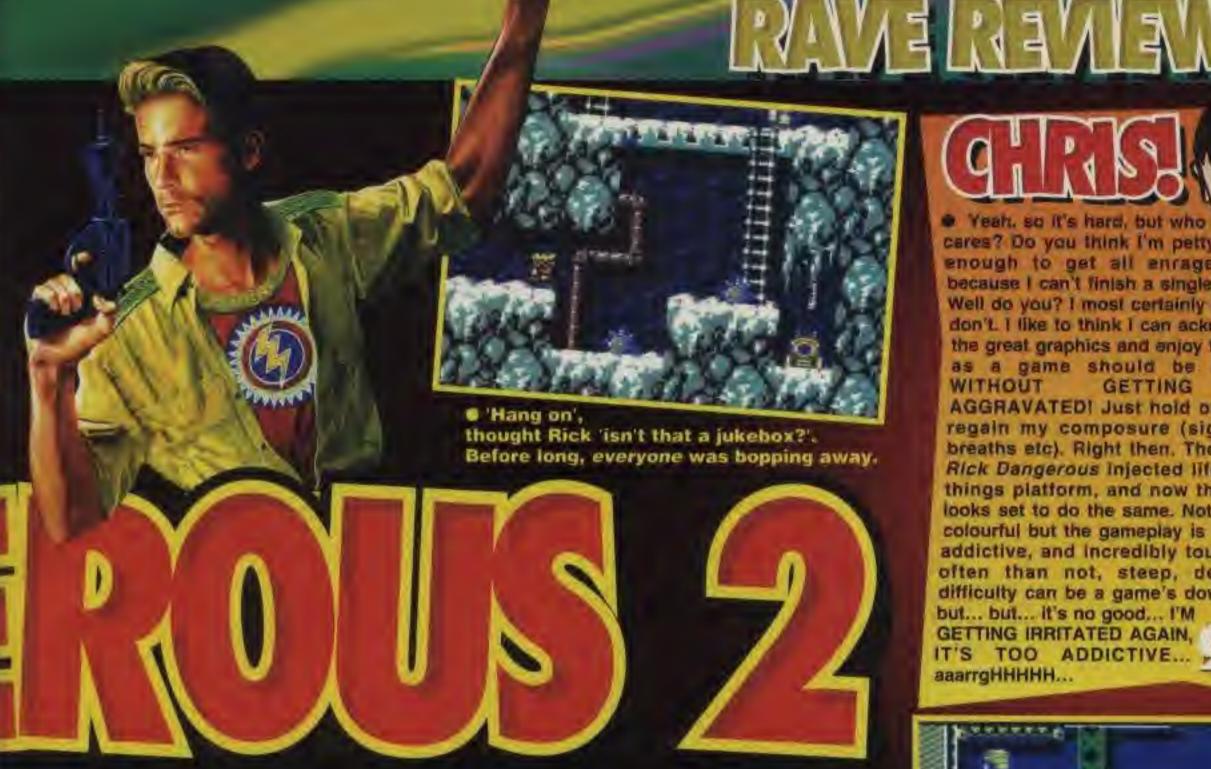

However, it you suffer from a high blood pressure or heart problems.

However, If you suffer from a high blood pressure or heart problems, perhaps you'd better give it a miss. As I've already mentioned, it's a real killer on the difficulty front and those meek of nature will undoubtedly scurry off to hide in a corner after their first go. Few games have raised such a volume of expletives in the COMMODORE FORCE office; the Editorial Assistant had to be ushered out of the room before his naive little mind was tainted by our barely-coherent screams. I'm surprised the walls haven't melted — I wonder who taught Chris words like that? Oh

Thanks to our designer, we've got to write the longest caption in the world. In fact, it's more of a novel than a few lines of text, so here we go. Once upon a time there...

well...

is, until they blow poor Ricky to that great adventure in the sky. Wit and cunning are our hero's greatest assets, and remember — the seemingly easy route probably leads straight into trouble. A careful lookout must also be kept for various switches and levers dotted around each level. These activate lifts, guns and various other widgets which can be made to A lasting, work to your advantage, but exploration and forethought is appealing and required

The game takes you across attractive live levels. You begin on a challenge spaceship, then put your longjohns on for a trip to the ice planet of Freezia. Level three takes you jungle bashing, four's the atomic mud mines and finally you get to grips with the oddly-titled Fat Guy your ultimate adversary.

The Dangerous Brother

The cartoony graphics are outstanding throughout

with Rick himself packing plenty of heroic individuality against superb backdrops. Although play lends to stick pretty much to a formula, any danger of tedium is alleviated by beautifully varied levels, each with a feel of their own. At times, though play can become frustrating - many problems are solved by trial and error instead of forward planning. In my opinion it should be at least teasibly possible to complete a game on your first go but, as I said many of Rick's puzzles are solved more by luck than judgment. Despite trustrating deaths, you still want to keep playing, 'cos you'll have worked oul how to do 'that bit" on the next altempt.

A nice injection of humour adds more to the appeal, not to mention an unfortunate, but highly amusing misprint in the inlay — take a look for vourselves tolks.

From start to middle (I didn't get any further) Rick Dangerous 2 a very polished product. Spot

FX are great, the title tune has a suitably rough 'n' tumble heroic quality to it and even the intro sequence is quite amusing

> It you liked the original and want more of the same RD2 won't disappoint, though be

warned — it's a little tougher than it's predecessor

Everyone else - get it anyway. For four quid you re getting a lasting. appealing and attractive challeng that's always worth coming back

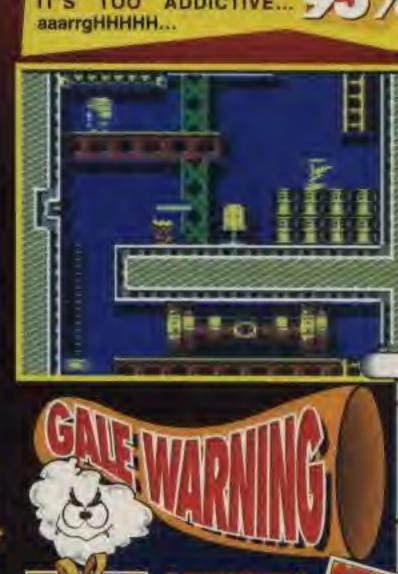

to It's a right. **Rickin** rave.

HEADQUARTERS ...

Yeah, so it's hard, but who cares? Do you think I'm petty enough to get all enraged because I can't finish a single section? Well do you? I most certainly hope you don't. I like to think I can acknowledge the great graphics and enjoy the game as a game should be anjoyed WITHOUT GETTING AGGRAVATED! Just hold on while I regain my composure (sigh, deep breaths etc). Right then. The original Rick Dangerous Injected life Into all things platform, and now the sequel looks set to do the same. Not only is it colourful but the gameplay is incredibly addictive, and incredibly tough! More often than not, steep, demanding difficulty can be a game's downfall but... but... It's no good... I'M GETTING IRRITATED AGAIN, IT'S TOO ADDICTIVE

GOOD INTRO, LEVEL SELECT OPTION

PERFECTLY DEFINED AND DETAILED

SUITABLY ATMOSPHERIC AND EXCITING

MUTTE . TRICKY BUT INSTANTLY APPEALING

MHIMTY . IT'S BIG, HARD AND FUN

C-FORCE No.8 MAUGUS, 199

it's back! The second half of the world's most definitive guide to C64 coin-op conversions. This month it's the Ms through to the end. MILES '10P A GO' **GUTTERY** is the guy with the infinite credits...

MAG MAX Imagine

hat bug-ridden, clammy, toe-nail sort of game is this? It crashes at any opportuni, and even when it doesn't you find yourself getting mashed by invisible baddies time and again. You're unlikely to find a copy these days as it's pretty old and believe me, that's

MADNESS Ariolasoft

probably for the best

If you've played Spindizzy (if not you'd bette have a ruddy good excuse, 'cos it's

great AND was free on last month's covertage) you'll notice the similarities between it and Marble Madness, only Ariolasoft's effort is a bit on the naft side, between you and me.

MARIO

Ocean

right, calm down! Before you get top excited let's get. one ming straight. this air t Mano in his usual role on the SNES NES of Game Boy/Girl ino blatantly sexist references in this mag) It's in fact a doctoy (with a capital dodgy) Ocean license from several years back. At action lakes place on single, static screens, with Mailo land Luigi in two-player) doing, um, not much interesting. You see, it isn't really very good.

Perhaps it holds some value

as a curiosity piece.

MERCS US

variation on the Commando theme. Mercs is

another scrolling romp across miles of enemy terrain, with you (and optional friend) filling swarm after swarm of marauding troops with a healthy dose of lead.

Graphics are of a decent standard, but the action is marred by slowness of scrolling. You either wait for it to catch up, or plough straight into a squad of enemies you didn't see coming. Not that good, not

METROCROSS

Kixx

that bad.

ere's an odd little racey game from a while back. Make your way as quickly as poss from one end of the track to the other, hitting booster pads, avoiding obstacles and leaping aboard

skaleboards, and it's all nectic fun. Well, not really. There's no real compulsion to it, and your mind will soon drift elsewhere.

Hit Squad

his was praised highly on most iconals although I seem to be in the minority who thought it lacking to certain areas. The C64 version is a

ittle slow at times, but in fairness, there's a great deal of graphical variety and blifable-baddies aplenty. Not brilliant, but certainly worth your pennies

MOON CRESTA

Incentive

erhaps the original coin-op conversion. Moon Cresta was the focal point of many an arcade at the start of the eighties. How things change, eh? 12 years on, it'd be lucky to get a second look, let alone anyone actually shoving their cash in for a game. Today's more sophisticated players should take a trip down memory lane, and see how it all began, sort of

limb aboard a short, stubby helicopter and take off in pursuit of many other, equally unaerodynamic flying machines Fly up behind them when they're not looking and shoot them down with your short, stubby machine gun. In fact it's quite a short, stubby game

STUDDY Way.

which you'll enjoy in a short,

The Hit Squad

ow here's a tricky one Excessive violence, astronomical body count, exploding corpses - sounds all right so far, but what's this? Yeeow it's hard! No sooner do you appear at the start of level one, when half a dozen druggles start ripping into you with rapid-fire weapons. I mean, I'm all for funous gameplay but there are limits. If you really

think your trigger finger's up to it, then by all means invest in a copy of Narc - it's as frantic as they come.

Kixx home computer formats on which it

NEMESIS Konan

playable shooter, this one. Admittedly, there's some annoying sprite flicker and the collision detection can be a little unsatisfactory at times, but good variety in graphics and tough

gameplay blends to make a good challenge. You'll already have 100 similar games, but there's always room for another, and Nemesis ain't 'all bad.

W ZEALAND The Hit Squad

hose soft-hearted Japs are at it again, this time with Kiwi birds as their loveable subject matter. Maze after platform maze are between the flightless hero and his goal - to rescue his friends who've been imprisoned by Wally

the Walrus. A classy conversion and a great game in it's own right. You'd be a 'New Zealand' to miss it (Pardon? - Prod Ed).

Thunderboll's trousers.

The Hit Squad

ashed but in a hurry after a series of mess ups Obstation Thursderbolton the C64 is a few munds short of full clip to say the lensi. Dull backdrops unpaying, fluctuating difficulty level — let's face it, if this type of game has one major flaw inherent in its design, it's that it get's exceptionally repetitive A certain 'bomph' is needed to keep you interested, but 'comph' is lar from abundant in

OPERATION WOLF

The Hit Squad

This wasn't the first cabinet to carry a gun, but it's still regarded as the granddaddy of its type. Say 'first-person perspective shoot-'em-up' and you're likely to receive a blank look, say 'Op Wolfish' and suddenly you're speaking everyone's language. Despite somewhat over-sensitive joystick control and a mouse option which doesn't appear to work, this classic has transferred well to the C64. There's plenty of on-screen action, clear, well defined graphics and a wealth of enemy hard

The Sales Curve

great conversion of a not-so-great original is how I'd describe Ninia Warnors. It's graphics are surprisingly close to it's cabinetted parent, but it's a shame it had to inherit the slightly

tedious gameplay. A respectable amount of blood keeps up appeal, but play is, at times, too samey Even so, it's good for a while and always worth coming back to on a wet atternoon.

NINJA SPIRITS Activision

It's finy sprites and fairly boring backdrops aren't that exciting, but nevertheless Spints offers pretty respectable playability. Stride across the left to right scrolling levels, sword in hand, combatting the many and varied minions after your blood. Progress is made more rewarding by some nicely drawn end-o'-level guardians, and although character animation is a little

'cardboard', things chug along at a reasonably enloyable page. It's no ground-breaker, but then again, how many new concepts do you see these

opinion, the best racer in 64-land. Sadly, Commodore Outrun isn't even a shadow of it's mighty parent.

ne of the all-time greats, the legendary Outrun was a huge let-down across all

appeared — the C64 being no exception So it's fast, but the fact is there's very li actually moving on screen. Graphics a shabby and it's been infinitely surpass by two sequels. Turbo Outrun isn't be

and Europa is, in my humble

THUNDERBOLT Firebird

ice chunky sprites are the order of the day this horizontally scrolling WW2 blaster. Tak out waves of Jerry fighters as well as bombing tanks and AA guns on the ground. What I hate about this kind of game is that the enemy don't behave like real pilots — they just attack in preset

patterns. Despite this gripe, it's a fair trigger exercise - but that's all

PAC-LAND Quicksilva

he yellow chomper's games always seem to have a strange appeal, and Pacland's no exception - it's a great little game. Stomp around Pacman's colourful homeland

being continually charmed and amused. What more can one ask for?

REDIT OO

C-FORCE No.8 MAUGUST 19

PACMAN **US** Gold

acman's a real treat for the nostalgic, but most gamers are likely to take one look and chortle. Obviously, by today's standards, the game amounts to a big round zero but it's unlorgettable all the same

PACMANIA D Grandslam

www.do you update the classic maze formula of Pacman to appeal to a more contemporary audience? Well, if you put that question to Grandslam they'd probably say 'llip the view to a 3D angle, enlarge the graphics and scroll the play area. And waddya know - It WOTKS

Ocean

rayel the world, visit wondrous sights and burst balloons. Right, that's the plot out of the way. Now let me tell you about one of the most addictive two-player, co-operate and exasperate games you'll see. Perhaps a little lacking for solo Pangers but believe me - bursting bubbles with a friend is

APERBOY

something everyone should

try at least once.

Encore

aperboy has legions of fans, and is certainly a fair representation of the famous machine. It's playable enough for sure, but rather repetitive and, basically, doesn't have the appeal of the real thing. You know — getting up at half-live on a wet and windy schoolday morning, trudging several miles, and getting paid a pitrance that barely kept you in Curly Wurlies for more than two days. Ah. lond memories.

Encore

or a sport tailor-made for computer games there are lew really good tennis sims around. Passing Shors different, in that you get a 3D view for the serve which then flips to 2D top-down during rallies. This, really, is only cosmetic, and

adds little to the game. With the court frequently scrolling your player off screen, you can get disonentated and play suffers accordingly.

PIT-FIGHTER The Hit Squad

conversion that should never have been attempted. The novel arcade original used digitized graphics of real people as it's selling point, of which the '64 version is shipped. As a result, it's a tedious, unresponsive and unplayable beat-'em-up wirn very little that will

POLE POSITION US Gold

appeal for anyone:

repare to qualify'. Ah, who can forgel those immortal words luttered so seductively when you put ten ipee in the slot? I always wanted to meet Ithat woman. Maybe true love can Itranscend most boundaries, but clearly Inot the one between arcade machine and home computer Gone are her sultry tones, and all that

MALEN MERCEN METER

POWER DRIFT **Activision**

Be harl Formula One was never like this. The guestion is, how could the thrills of the I breathlaking original be squeezed into just 64K? Well, obviously they couldn't, but C64 Power Drift is a valiant attempt all the same. It's fast, and I there's some pleasing stomach-chuming hills abound. Even the effect of the

buggy spinning (which is often all-too laughable in these things) is rather impressive A good solid racer and no mistake:

PSYCHO PIGS

US Gold

remember the intamous ad

campaign?

ne of the oddest yet most compulsive concepts for a computer game ever. The aim's simple. There's a screen full of bombs and marauding hogs who, on the command 'go', run around attempting to blow each other up with the scattered Inceridiary devices. Zany - It sure is! With two players it's well worth a bash (and a laugh). Now, anyone

The Hit Squad

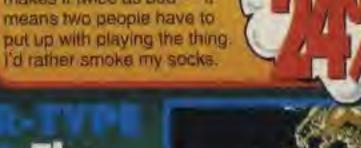

fall the brain-twisters that were inexplicably launched upon us a couple of years ago, I believe Puzznic to be the

best. You may not think it suits your tastes, but if any game's gonna convert you to the genre, this is it. Just don't expect many restful nights...

Activision

eary deary doggins! Not only does this monstrosity bare only a passing resemblance to the arcade version. but it's a complete turnip to bool. Two player action makes if twice as bad - if means two people have to put up with playing the thing.

The Hit Squad

alled in it's

Spectrum quise as an all-time great, the C64 version enjoyed considerably less of such praise being forced into it's dusty

pockets. Unless they've something to really make them stand out from the pack. scrolling shooters will always lade into memory. Sadly, this is the case with R-Type

RAINBOW ISLANDS

The Hit Squad

is so sweet you almost want to cry. Chubby little heroes, chubby little baddles, a whole spectrum or nappy colours and all those rambows.

Add to this playability honed to the point of perfection, a difficulty curve set on just the right side of manic and you have one of the best games around C'est lantastique!

RAMPAGE **Reel Action**

Why bother reading this when you've got It on your covertage? Shouldn't you be

playing it? Go on TIOW. scurry off and do SO ...

RAMPART

Domark

slightly unusual coin-op, this one. Up to three players can build castles by placing various geometric wall parts Tetris-style on the play area. then blow each other to kingdom come. Simply for the novelty of simultaneous three-player action. Rampart's a jolly bash. Things

can get incredibly frai tiht and despite the incomprehensible scoring system, it'll keep you at it for

RASTAM SAGA The Hilt Squad

etcha loin-clothas on for another overmuscular, mythrical hack and slash epic. Rastari seems, ratheer unfortunately, to have his broadsword shoved I firmly where demons lear no tread.

as this really isn't a wery enjoyable game. If you're a closel gladiator you'dd be far better off searching out Barbarian 1 and 2

The Hit Squad

never liked the cartoon, and the computer game emerges to a similar unimpressed reception. A grating rendition of the famous theme welcomes you to the title screen, and from there on, it's little short of a chore. Small, splodgy sprites run around zapping rather non-descript monsters, in a game where innovation and Ideas seem

completely non-existent. Even in simultaneous two-player mode: excitement is unlikely to rise above an inaudible murmur.

RENEGADE **Imagine**

h, one of my all-time faves this - a beatem-up which allows all the dirty tactics you could ask for. Knee 'em in the grain, kick the smeggers while they're on the deck - sheer

bilss. Many an enjoyable hours brawling's in store for anyone with the brawn to try it out. Without doubt one of the C64's finest moments for sheer arcade fun. Love it.

METHER ALL DER

The Hit Squad

aking a detour after the vector based 'prequels'. ROTJ is a diagonally scrolling shoot/avoid-'em-up. It's jolly enough for a while, and helped a lot by the tie-in. but never aspires to greatness.

ROAD RUNNE

Kixx

eep Meep! The Cartoon capers of our beloved editorial assistant's role-model are the tops. Phy about his C64 appearance...

ROADBLASTERS US Gold

o, please, take it away! I won't beat around the bush - I dislike this 3D racecum-shoot-'em-up with a passion — a passion born of disillusionment, that so dull a product could ever a shopshell fill.

RODLAND Kixx

if you tuned in to last ish, then you'll recall the yours truly reviewed this very game as a rerelease. If so, then you'll also remember that I rather liked it, and guess what - I still do! It's just one of those games you have to play again and again. It ain't

staggeringly tough, just fun through to the underfelt. Last mumph I gave it 89%, but as I'm a particularly happy chappy right now I'll go one more...

THUNDER

US Gold ow here's a real oldie. The inspiration

behind Shinobi and the more recent Shadow Dancer sets you as a 'Rolling Thunder' agent striding along platformy levels, blowing away dozens of villains. This game's really starting to show it's age and.

with restart points being very scarce, can really frustrate. Not up to today's standards, but worth a blast if you're in the mood.

US Gold

ygar's derivative, boring and charmless. In fact, can't think of any more to say about it. My utmost applicales.

Kixx

crolling shooter with

a twist in the tail n mechanical dragon's fail that is. You're a mystical motorised creature flying left to right destroying all who stand in your way. Careful use of that previously mentioned tail is important, as it's impregnable nature makes a

useful shield against enemy shots. This is certainly one of the 64's more playable members of the genre, and won't disappoint any discerning joystick-basher

C-FORCE No.8 . AUGUST 199

SALAMANDER The Hit Squad

his is one of, if not the best looking game of It's type in '64-land and, for once, ultraattractive graphics are blessed with spanky gameplay. The

action's non-stop, the sprites are detailed and clear, and smiling cherries are just around the comer. You catch my drift?

Activision

ere's one game that I can safely say has never appealed to me. It's not 'cos I'm a particular pacifis! (no more than anyone else anyway), but for the simple reason I find it tedious,

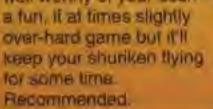

dull and naff. At no point during play, does the shootem-up action of SDI rise above mediocre. I never realised nuclear war could be so yawn-inducing (sigh).

SHADOW DA

Kixx

et ready for some heavy duty 'ninjaing' the Woodhouse way, as man and beast form a formidable fighting team. With faithful mutt at your side, take on level after level of martial arts mayhem. Having just recently appeared on budget, Shadow Dancer's well worthy of your dosh a fun, if at times slightly over-hard game but it'll

nother ninja lighting game, this lails to hit the mark by a fair whisek (pun intended). Shadow Warriors is slow, dull and distinctly tacking in variety of moves. When you think of Way Of The Exploding Fist and just how long ago that

was released, it seems preposterous that such poor beat-em-ups are still doing the rounds. The sorry fact is that they are, and you have the challenge of avoiding them at all costs.

SHAO-LIN'S ROAD The Edge

he sun has go! his hat on Hip hip hip hooray The sun has got his hat on and he's coming out to play.

but he's not going to play Shao-Lin's Road on account of it being rather poor

SHINOBI Mastertronic

at a bad conversion of the popular platformshooty thing. It's thoroughly playable stuff, which lans of the original will lap up. Everyone else? Well, give it a try and you never know - you just might like it.

SILKWORM

Storm/Mastertronic

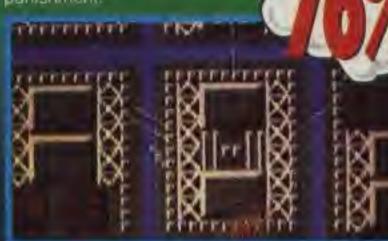

his remarkably popular left to right shooter featured the. then novel, now standard. pairing of helicopter and jeep, alone against the world. Essential for your collection Mrs Robinson.

The Hit Squad

lmost ready to draw its pension, this ripe old blaster could teach some of today's shooties a thing or three — the phrase 'fast and furious' wa made to measure. It may not keep you nyetted to hours on end, but you'll have

plenty of excuses for serious short-term joystick punishment.

SOLDIER OF LIGHT

If thought-out graphics and clurnsy controls are never the best ingredients to start a game recip with. As you may have guessed, SOL has 'em bol a shame, as we could've had a playable blaster on our hands. It isn't that

bad: there's just a few niggles that could (and should) have been ironed out. A lack of serious play-testing. I'll wager.

entertainment for the TV loving public. A 21st century version of The Price Is Right, Smash TV sees you blowing away thugs en masse for big prizes - such as cash, holidays and even toasters! It's marry, harmless fun, that no slightly unbalanced psychotic should find him/herself without.

The Hit Squad

scome a pirate and sail away to high adventure on the Spanish Main Alternatively, grab a copy of Skull And Crossbones and get bored senseless. Never has the acquisition of pieces of eight been so laboured and thesome. This, capped by annoying bugs like getting stuck on a screen if you miss one baddy earlier on, make SAC utterly forgettable

Ocean

his collection of gamestyles scores highly for variety, but no section has been given the individual thought required to make it much cop II's graphically line with some effective parallax, but unfortunately unchallenging, shallow gameplay and one of the most diabolical multiloads this side of Street Fighter 2 ensures it'll gather dust in attics all over the world.

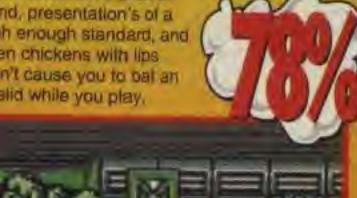

SPACE GUN The Hit Squad

p Wolf hits the space-ways with as much blood in guts action as you could hope for, All manner of grisly allen beings explode in a shower of limbs and entrails, as you attempt to rescue captives aboard a drifting space hulk. With the arcade machine's huge gun replaced by a small floating cursor, these things never have quite the same bite after

conversion. On the other hand, presentation's of a high enough standard, and even chickens with lips won't cause you to pat an systid while you play.

SPACE HARRIER

Encore

oah there! Talik about getting chucked in at the deep end — this game is quick, and I mean QUICK! So quitck in fact, it seems that the programmers, in their eagemess to make a game to break the sound barrier, torgot one minor detail - playability. You get a huge number of lives, but that's little consolatiom.

considering the ludicrous difficulty level. Any number of unavoidable deaths crush that delicate little derm known as enjoyment into dusst.

Ocean

hase HO (SCI's prequel) was, to all intents and purposes, a disaster on

the C64. Thankfully, SC/ is speedy, action-packeed, colouitul, cuddly, upwwardly mobile, born of noblee blood and without prejudices, slow pace or long pausess.

Kixx

we remarkably differrent versions of this game. came into existences. A US version with clear graphics but plagued byy un-responsive controls and a British version beastining large sprites and

scrolling backdrops. Twvas noted, however, that booth games fell way short of the mark that denotes qualifity software. And with that .. a suitably low mark was aawarded.

STREET FIGHTER 2 US Gold

in this seemingly impossible conversion, all the characters and, amazingly, all the moves are included - some of the playability (if you look very carefully). The program is, however littered with burgs. Visuals are messy and break up at times and the multiload - againght

Though inevitable, it's still a nightmare by any standards. A game beyond the limitations of the machine, and as such you should torget about it.

US Gold ne of the most impressive things about the

original Strider were the mighty end of level guardians. Obviously, some of these have been omitted from the '64 version, but the real prob is the difficulty. One thing I can't stand in this type of game are very tight time limits. What's the

point in nice detailed graphics if you can't hang around long enough to appreciate them? On well

SUPER MONACO GP Kixx

rive around some of the most famous race circuits of Europe in this rather line example of

the genre. It's quick, good looking, and with the novelty of a rear view mirror that actually works. Okay, so it's not that vital, but a nice touch all the same. Yep. I can recommend this un.

The Hit Squad

hat in the name of pre-decimalisation is a self-hypnosis prog doing in a coin-op conversion round-up? (is that a record for the most hyphens in one sentence I wonder?) Okay, it's nothing so sinister unless, of course, you term a doday 3D mess as sinister. You see, this is a bad concept which has turned into an even worse game. It's supposed to be a supersonic fuluristic

laugh. No gameplay, no

The Hit Squad

Male hat d'ya get if you take an age-old formula spruce if up with some pretty backgrounds, add a couple of sub-games and sprinkle a few add-ons over the top for good measure all without sacrificing what made the original great? Super Space Invaders, that's what

expenence all the thrills and spills of monster truck racing from the comfort of your own. armchair Endorsed by Ivan Ironman' Stewart apparently one of the stars of the sport - you go to take on the man himself as well as a friend in two player mode. An attempt to update the class Supersprint formula, Off-Road has some very ta vehicle animation. The prob. is

that, with all the bouncing and jostling, you never tee! totally in control. With a second player it's alright for a bit, but still not much to shout about

SUPERSPRINT The Hit Squad

nexplicably. Supersprint made a spluttering and unimpressive appearance on the C64. Graphics were never the game's strong point and people always moaned about the awful collision detection, but it was still great fun on other systems. The C64

version, however, seems to amplify all the bad points and adds dreadfully unresponsive controls to bury the gameplay.

US Gold

hunderblade's conversion was as good as cohave been hoped for. That's not to say, thoug that it's particularly great. Things are made extremely tricky by sluggish controls and ocasionally-messy graphics, obscuring incoming missiles. It's top-down and 3D viewpoints add variety, although vertical sections do seem bland comparison. Still, impressive end-level monstrosities are smart, and the high difficulty will

keep you at it you don't tear a your eyelasties out first.

Capcom

ash along duffing cutlass-wielding thugs as you go, in this so-so adventure. What really spoils it is the end of level guardians - they're just so blasted hard to kill, and this is made worse by the heroes inability to change direction in mid-air. Even so, graphics are fair and

baddies show at least a small degree of intelligence. It's small consolation but you can't have everything can you?

C-FORCE No.8 MAUGUST 199

TOKE

large platformy world awarts you, the unfortunate star turned into a chimp by magic powers. Conquenting the game is the only way back. It's big, bold and brazen. A good challenge for platform addicts.

Ocean

TOOBIN' The Hit Squad

he coin-op featured an odd 'circle of firebuttons' control system which, when lost in conversion, made computer variants a little tricky to get to grips with. Even so, controlling the hip

Even so, controlling the hip 'n' trendy Biff and Jet as they travel down various hazardous rivers is quite cheerful, and a sprinkling of humour is always welcome.

程: Fame g 和 chepars 和 能

TRACK AND FIELD

Konami

oncha just hate wagglers? I mean, not only do they kill joysticks but they all handle identically. It's an outmoded idea that's okay for a couple of goes, but not worth the effort playing at

TURBO OUTBUR

Kixx

straight 3D racer that fails to excite in much the same way as it's predecessor's conversion did. True, Turbo's a signification than the original Outran drive, but when compared to Outran Europa, it pales

to Outran Europa, it poles quite dramatically. It simply doesn't grab you by the shoulders and scream 'Play me' and you won't. Not much, anyway. Better games have appeared since

TURTLES 2 — THE COIN-OP. • Konami/ Imageworks

raphically outstanding and with marvellous music 'n' FX, T2 is a highly-polished package. Beneath the classy streets that are the presentation however, lie the murky sewers of the gameplay. Well, actually it's not that bad, but I couldn't resist the

pun. I must admit I was never over-struck by the arcade version, but fans won't be disappointed. There, I didn't even say cowabunga — oh damn.

UN SQUADRON

US Gold

nother of the 'relied on its graphics' coin-ops
that becomes seriously average in it's
transition to the C64. Three different planes are on
offer, but basically it all adds
up to the same thing. Blam
connoisseurs will get a kick.
but most people will
doubtlessly want a little more
depth and originality.

y mother used to read me stories at night. One I'll always remember involved a computer game, with attractive graphics but terribly boring gameplay.
You know, it's uncanny

terribly boring gameplay You know, it's uncarnyshe could almost have been talking about Vindicators...

MANS The Hit Squad

MER

games, so everyone take a leason from WEC Le Mans on exactly how it shouldn't be done. This game is should to say the least. Sense of speed is negligible, roadside objects are blocky and poorly drawn and the sound's awful. It's supposed to simulate the famous 24 hour race — you'll be lucky

WONDERBOY • Encore

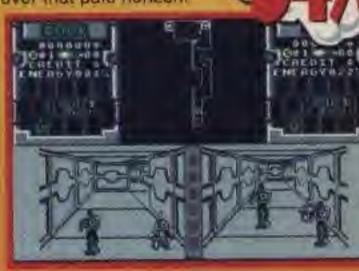

eing a bit partial to a good platformer, it was

Sure it's well passed retirement age, but that doesn't stop it from being badly thought-out, and far too sasy. Visually, it's quite attractive (at first glance) but a lack of detail and some unpleasant sprite-obscuring backgrounds just compound overall apathy. The years have not been kind.

XYBOTS The Hit Squad

where two players run along 3D tunnels blasting allens and collecting bonuses. Lack of speed is the main let down, although the monochrome graphics do little to inspire further exploration. Tricky controls don't help proceedings either, meaning you often wander

unawares into the midst of raging gun battles. Okay at first, but boredom is never far over that pale horizon.

Imagine

o prizes for guessing this is another beatup, and, as with so many
others, there is not much to
shout rude poems about. On
the up-side, it's quite a
toughie if you're after a
challenge, but don't kill
yourself trying to hunt it down.

Righty-ho, that's your lot then — every C64 coinop ever. Weeeell, probably not, actually, but then again I'm the kind of a guy who just doesn't care. Feel free to write in with any that I've missed to the usual address, and I'll bin 'em without reading 'em — so there!

GETCHA CAVERN IN ORDER...

ant to order a game? Can't find that elusive classic that you've read about? Don't hesitate — drop Computer Cavern a line. They'll be more than pleased to help, and certainly know their stuff — they've been established since 1984! Their address is as follows: Computer

Their address is as follows: Computer Cavern, 9 Dean Street, Marlow, Bucks S17 3AA. Tel 0628 891101, Great, eh?

he 8-bit Asylum is a place where tew dare enter. On the outside it looks calm and composed, almost pleasant some would say. But appearances often hide a darker le and 8-bit asylum is no exception. At night, the dormitories are full of saddened ones — Spectrums whimper as they struggle against their restraining bolts, Amstrads whine as their cages are re-enforced and Dragon 32's are injected with graphic-generating drugs. Mega Drive matrons and SNES supervisors patrol the area, harshly silencing the new arrivals — NES and Master Systems who, unaccustomed to their new surroundings, kick up a fuss about the days when they were in charge. Huddled in the corner of the ward cowers a solitary '64. It solemnly weeps into it's coarse issued gown and recalls the days it

used to share with it's beloved owner. If only he'd collected more games' blubbered the '64, 'he wouldn't have thrown me to one side. A sorry tale indeed, but one that can stopped! Oh yes, because the story we've just related is yet to happen. In fact if may not happen at all!

You may be such a Commodore owner who would like to get your hands on toads of C64 software, and yet tragically, due to either financial reasons or just because of life in general, do not. This is the page to change all that.

NASCR (National Association of Specialist Computer Retailers) are a group who support the '64 to it's fullest and strongly believe it's a long way from being hauled off to any asylum. They re dedication and support means one great thing for Commodore users — they've got a lot of '64 software. Thanks to NASCR and one of the best

stockist around — Computer Cavern/Capri Marketing — we've 200 quids worth of software to dish out to several lucky winners. The overall winner will receive the software of their choice up to the total of £100! Just think of how many games that could consist of — lots, basically! And that's not all because ten lucky runners up will each gain £10 worth of games, again, of their choice — now is that generous or what!

Of course, it's not gonna be that simple but the prizes mayb yours it you can complete the following questions and lie-breaker.

1) Which company supports the '64 to it's fullest? 2) Which software stockist is one of the best around?

Tie-breaker, to be completed in no more than a small sentence: If I received £200 in cash i would...

The most original and funniest enswer will take away first prize — obviously.

Send your entries to: Gis us sum games, COMMODORE FORCE, Impact Magazines (UK) Ltd., Ludlow, Shropshire SY 1JW.

and climb cliff. Right, place bomb at base of boulder. Admire explosion, walk left, climb dow cliff. Left, down twice, right, collect scroll, right. Enter doorway holding scroll and nunchaku the defeat the shogun.

FLIMB TES

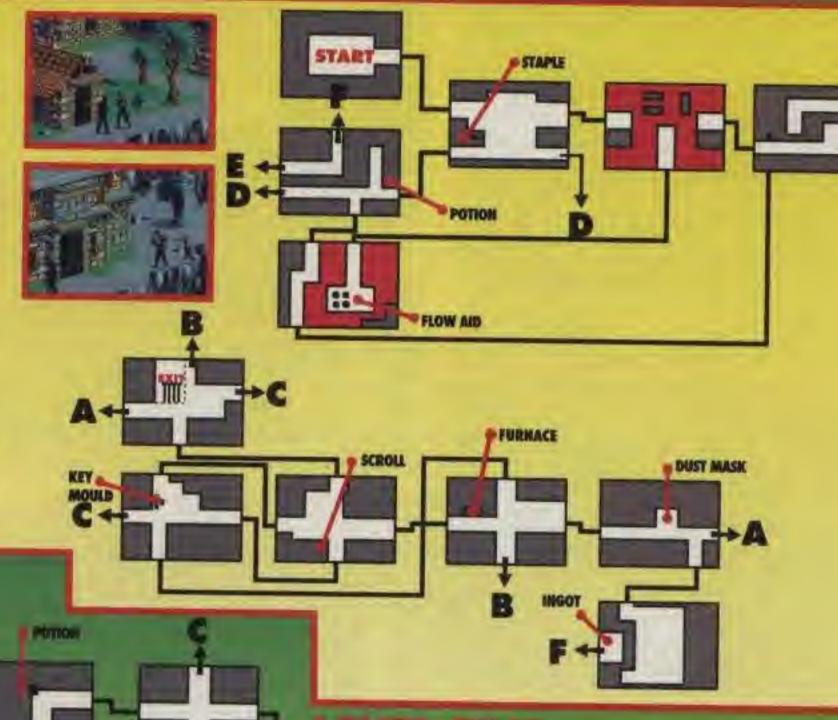

LEVEL THREE

Go up, collect scroll from doorway. Up, take left-hand path and nab staff (hidden in reeds at bottom of screen). Head left twice, collect potion from pot before walking up. Jump onto jetty to next screen and collect plug from topright corner. Walk back along jetty and jump off. Take bottom-left path to obtain shunken from behind hut. Head up, left, take bottom path to waterfall. Cross bridge, go down twice and select plug. Walk to drain at waters edge and use pick up motion (you'll flash when done correctly). Go up twice, enter doorway holding scroll and nunchaku, deleat shogun and enter lavel four.

LEVEL FOUR

Go into next room and collect staple from box. Take bottom-left path and get potion from cauldron. Go back to previous room and take top-right path. Jump lava using central path, NOT THE FLOATING BLOCKS! Go right, hold staple, climb wall, follow path until you emerge from doorway and collect gold ingot. Climb down side, up onto next screen and pick up dust mask. Head back the way you came, climb wall, go left and jump onto central path. Select dust mask and walk right. Collect flow-aid and exit room. Right, select staple and climb wall. Follow path and climb down wall. Up, left twice, get scroll. Left, collect key mould from bones, up and right. Select bellows, stand in front of furnace and use pick up action until fire burns brighter. Hold key mould and use pick up action again - a key should now be in your inventory. Select key and go down, killing bad guy. Turn to face gate and, whilst holding down fire, push up, left/right, and gate should open. Go down stairs holding scroll and nunchaku. Wallop the shogun to continue.

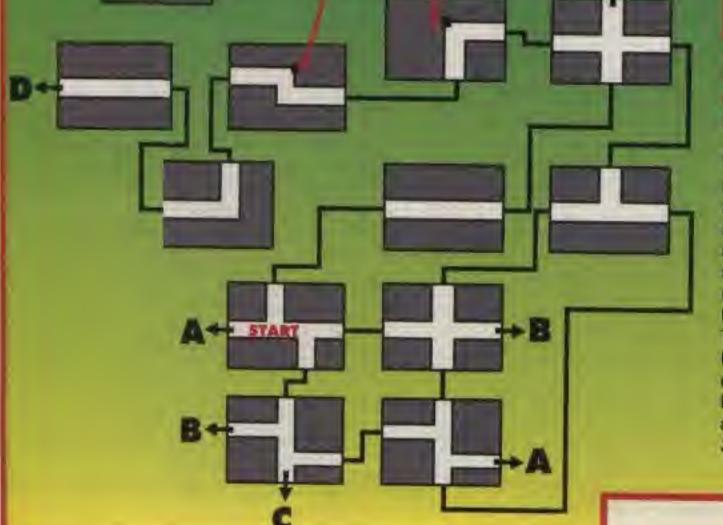

LEVEL FIVE

If using a lives poke, only use your fists to fight as you'll get full bushido, which will make the final controntation a lot easier.

Use top path and continue until you reach first set of crossroads. Take lett-hand path and collect petion from corner. Go to next screen and get scroll BUT DON'T SELECT (T VET) When at the evil shogun's chamber, stand in centre of star on floor. Select nunchaku and push up, lett/right on joystick. Keep position held and select scroll. The shogun begins to throw

shunken which deplete your energy, but if you've full bushido you'll survive.
The more bushido you have, the easier this confrontation will be.
But fight on, and low and behold, Last Ninja 3 is finished!

Leave Lee here at the start and go sort out the rest of the level.

You can leap over and shut the trapdoor, but to make things quicker just fall down it!

Close the drains to stop the water pouring out.

Hold Lee at the edge of the platform and wait for the barrel. Get both Lee and Ralph on it to begin with, as the lad hais a tendency to walk off!

EXTRA LIFE

There's only one way to get Lee across the gap. A traditional kick in the pants!

Wait at the roadside until it's safe to cross. When it is, push Lee across — fast!

veryone puts a lot of effort into the tips they send in, so there's nothing more disheartening than getting your work printed but not yer name! Being a fool, I totally forgot to give Alex Dobson a mention for the astounding First Samural tips he sent in. Fortunately, Alex now has the answer to the last three levels, so here they are in addition to the first instalment back in Issue 6. For all your hard work, Alex, a mystery prize will soon greet you.

This level is much the same as level six. You need four diamonds to safely get past the energy beams, towards the end of the level. Don't worry when you can only find three diamonds, as the final one is found after the first two energy beams. The final baddie is reasonably easy to kill — once you know how. Lash out with the sword and when it spits a fireball, move inwards. As it moves higher up, use the platforms to reach it. Touching the baddie doesn't harm you, only the fireballs are fatal.

The code is BZGVSN. The end baddie is a walk over. Just jump between the lifts, collect all nine pass keys, go up, summon the wizard, hit the energy beams, hit the rocks and exit the level

And they did say unto me 'Oi, Tipster, give us some pokes pronto' and I did calmly reply 'okay, okay, give a Tipster a chance', and as if by magic, a subtle portion of pokes did appear.

Arnie - 32846, 173 43669, 173

43787, 173

44250, 173 = Infinite lives

Gladiators - 11199, 173 = Infinite

Robin Hood Legend Quest — 35715, 173 = Infinite energy 35710, 173 = Infinite lives

LEVEL TEN

Collect the scrolls to reveal the demon at the end. To find the scrolls, however, you must first collect a lamp. Two of the scrolls can be reached by bridges built by the wizard, so if in doubt, call him. The demon is hidden behind a curtain at the top of the level, It's fairly easy to spot because (a) there are no other bits of scenery with ominous looking bulges and (b) he has an appalling taste in colours. Once summoned, his head bursts through the curtain, but he's very easy to kill. Just jump around hacking at his eyes. Get in close, jump up and down and hack away. Ignore the fireballs - as long as you keep jumping, they'll miss you.

GOES TO HOLLYWOOD

Code Masters

s he a potato or a lump of lard? To be honest, I couldn't give a donkey's dinner, but rest assured it can get confusing — especially in the Maze Of Studios. Notice how the doors in this area are different colours? This is for a good reason. The green and yellow doors mean go to the right of the screen to get out and the blue doors mean go through the middle of the screen. Repeat this process to reach the beginning. Thanks go to Y Gregory from Bolton for letting us in on that one.

The amount (and quality) of the work you've been sending in recently has been excellent: detailed solutions, huge maps and original pokes and cheats.

Don't despair if your stuff isn't included straight away — there's a strong chance it soon will be...

Andy Page (Hull), Jonathan Hurrell (Cornwall), John Crompton (Wigan), Barry Byrne (Ireland), Sean Stimson (Wilts), A Hopson (Wilts), Dean Kelly (West Midlands), Michael Witham (Earth), Dave Hesford (Merseyside), Andy Edge (Notts), Barry McQuillen (Cleveland), Alex Sprake (Suffolk), Neil Boulton (Stoke-On-Trent), Paul and Gemma Moy (Devon), Adam Channell (Hants), and the many others I've failed to mention.

My treasured column has been intruded, stamped upon and severed this month to a measly five pages! But I shall not be defeated, I will not let James and his page allocations dictate what a Tipster can and cannot do. I will fight him on the beaches, I will fight him in the car park, I'll buy him a cup of tea and beg for my pages back.

So until that fateful day, enjoy the sun and all the potential it has to offer. The place where I work: The Tipster, COMMODORE FORCE, Impact Magazines, Ludlow, Shropshire SY8 1JW.

OVERTHE 三月月三 R = [1] RN (0) = THESTAR LC200

Dear Prof.

I've tried your little program to test the Sprint 128/IC 200 printer - it DOES NOT WORK! I get words on the screen but not on paper.

I had loads of hassle when I bought it from Datel. It kept crashing, printing out gobbledygook and I kept returning Sprint 128s. They tried to help, first saying it was my 'new' C64, then taking 19 days to send back the printer when I returned it to be checked.

Can anyone help?

You may ask what a headbanger like me is doing writing to a magazine like COMMODORE FORCE? Maybe I'd better put some southing Metallica on - that's betler (NO IT ISN'T -Brian).

When I used to have short hair (and a certain other 8-bit computer), there was a program called Voice Manipulator that allowed you to play music through your computer. Is there such a thing available for the C64? If so, can you put it on the covertage?

Peter Watson, Liverpool

Who needs to take up valuable covertage space when I can print a small, yet perfectly tormed, listing on this very page? Here we 90...

Brian

Mr J S Howells, Witton Under Edge, Glos.

Well JS, this is a problem and I've had similar trouble dealing with Datel myself. Their advertising still carries the Star LC200 package (with Sprint 128) and a separate sprint 128 - the company no longer stocks either.

Make sure you've set up the printer as

In my prime position as

described in the February issue, If you have, and the printer still refuses to accept commands, might I suggest you purchase the 'Universal Printer Interface' from Meedmore. Full details can be found in Issue Four of COMMODORE FORCE. You might also like to try a Centronics cable from Datel at £12.99 (but first read the letter elsewhere on the same subject).

he correct title for sprites is

actually Movable Object Blocks, or MOBS for short.

You'll recognise them as the

heroes, enemies and bullets of your favourite

technical adviser, I receive many enquiries concerning games — more to the point, how to create them! Well, the only true enlightment in this world can be found at my feet, so over the next few months I'll be bringing you hints, tips, complicated listings and helpful guides on how to write games. This will be backed up by a series of utilities on Reel Action. Let's roll!

computer games. But how do you make sprites? The first step is to understand that a sprite is made up of 64 bytes of information, although the last byte is left blank (more on that next month). Each byte is made up as follows: 128 64 32 16 8

128+16+8+1= 153

So, if you fill in all the boxes and add up the corresponding numbers across the tip, you get a total of 255. If all are left blank, the total is 0. Whenever you fill in a box, a pixel is turned on in the sprite. If a grid is left blank, the corresponding pixel is left blank (it will show the colour of the background behind).

Now, you need to have 3 'grids' or bytes in each row, and there are 21 rows in total

(21x3=63).

If you have any suggestions, or if you have a particular problem you want solved, write to me at the address at the end of the column.

Some of thee many topics I'll be coverring are:

- Sprites
- Sound
- Scrolling
- Backgrounnds

- Presentation
- Loadings and saving

more.

Raster interrupts ...and a whole load

Dear Sir.

I bought a Star LC200 but there was no Sprint 128 with it and so my mum wrote to Datel for one. They sent a CPL (Centronics Printer Link) cable and a program on tape. I followed your advice in the February issue, but when I typed in PRINT4 etc, the cursor disappeared and nothing happened. Even with the CPL program in memory I couldn't get it to work. Without the program, I get a DEVICE NOT PRESENT ERROR message. I have a C64, datasette, Star-LC200 and CPL, but no disk drive. How do I get it 1 working?

Marcus Watson, Newcastle-Upon-Tyne

The Centronics cable and how to use it has become a common theme in recent months, so here we go with some more advice.

If you want to use the printer from basic,

you'll need to do the following: OPEN2,2:PRINT2, "HELLO":CLOSE2

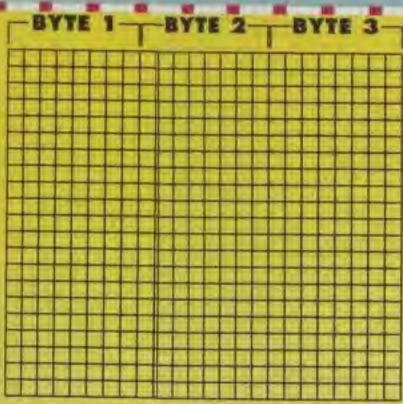

To list a program,

OPEN2,2:CMD2:list followed by Return Next type PRINT2:CLOSE 2 (Return)

If you wish to use the printer with commercial programs, you'll need to use the Centronics/Parallel/user Port/geoCable/device 2 option if there is one. The majority of programs will only work with device 4 (a serial number), and so my earlier advice on Meedmore's 'Universal Printer Interface' may come in handy.

Brian

Well, that's all for this month's letters. Send all mail to the usual address (below) and remember -I'm the guy to solve those techie problems. You see, there's no use in sending me games enquiries 'cause I won't answer them anyway. Bye!

So, you could take this larger grid, fill in the blanks and you'd thien calculate the values of the three bytes per row, then repeat for all 21 rows. You'd have 63 bytes of DATA to POKE into memory. The following program does exactly that, and displays the sprite - a pointing hand. You don't need to understand all of the listing, except that VIC stands for tthe VIC-II chip that controls all graphics. Each mermory location from 53248. (\$D000 hexadecimal) controls a certain function which will be explaimed next month.

10 REM * GURU PROGRAM 1 * 20 REM * SPRITTE DISPLAY * 30 PRINT CHR\$ ((147):VIC=53248

40 POKE, 150:POKE VIC+1, 150:POKE

VIC=21,1

50 POKE 2040, 1192 60 FOR 1=0 TO 612

70 READ A: POKEE 12288+1, A

80 NEXT I

90 END

100 DATA 192, 0,,0

110 DATA 224, 0,1, 0

120 DATA 112, 7,,128

130 DATA 60, 15,, 128 140 DATA 30, 30, 0

160 DATA 7, 252, 0 170 DATA 27, 248, 0 180 DATA 31, 248, 0 190 DATA 63, 252, 0 200 DATA 127, 252, 0 210 DATA 127, 248, 128 220 DATA 63, 241, 192 230 DATA 7, 227, 224 240 DATA 1, 199, 192 250 DATA 0, 143, 128 260 DATA 0, 31, 0 270 DATA 0, 14, 0 280 DATA 0, 0, 0 290 DATA 0, 0, 0 300 DATA 0, 0, 0

150 DATA 15, 60, 0

Hopefully, you can see how there are 21 DATA lines containing three numbers in each, exactly the same as the grid.

Now for an explanation of the program:

 Line 30 sets VIC to 53248 and clears the screen

 Line 40 turns on sprite 0, and places if at the co-ordinates of 150, 150 near the middle of the screen (X and Y co-ordinates must be in the range 0-255; more on this next month).

 Line 50 tells the computer where to find the data in memory.

 Lines 60-80 are executed 63 times, and READ the DATA before poking it into the memory from 12288 onwards (192*64=12288).

 Line 90 stops the program, leaving the sprite on screen.

Lines 100-300 contains the actual DATA.

When you have RUN the program, type in the following (without a line number)

POKE VIC+39, 1:POKE VIC+23, 1:POKE+29,1 This turns the sprite white (VIC+39) and expands it horizontally and vertically. VIC+23 controls horizontal expansion, VIC+29 vertical. 0 means no expansion and 1 means expand sprite 0 (the one we are using).

This series will start slowly and gather pace as we explore even more complicated problems and projects in muchine code and Basic, in the meantime, I suggest you try your local library for more books on '64 graphics, and also look through your 64 User's Guide for more information. You can write to me

Prof. Brian Strain, COMMODORE FORCE Impact Magazines, Ludlow Shropshire **SY81TW**

(what?! - LM).

After much chopping and changing this month, I've mysteriously ended up with a mere four pages. The Tipster, having suffered a similar setback, was last seen

sharpening knives and muttering things about Deputy Editors and confetti — whatever could be have meant? Anyway, next month I'll have my usual five pages, so keep those letters rolling in.

SO LONG, FAREWELL...

Dear Lloyd.

Alas, I'm afraid to say that this is a letter of larewell. I've been reading ZZAPI since Issue Eight, and have continued to read it through the change over to COMMODORE FORCE. But now. at Issue Five (ZZAP! Issue 95), I bid you farewell

 I've upgraded to an Amiga 500+. You've served your purpose well, with useful hints and

tips on what to buy, but times must change. Don't get me wrong - I'm not selling my '64 for any amount of money in the world. I've decided to stick with you 'till the next issue, but then I intend to change over to AMIGA FORCE. Hey, why am I apologising for buying an Amiga - it's your fault for putting the adverts in COMMODORE FORCE! Anyway, thanks for being there when I needed you most.

Graham Ross, Upper Walthamstew, London

It's always sad to see readers go, but at least we can take solace from the fact you're moving to our sister magazine, AMIGA FORCE, Hopefully, you'll decidle that you can afford

C-FORCE No.8 = AUGUST

both mags; in fact, why not buy several copies of both every month! Seriously though, be as good as your promise and keep your C64 - there's life in the old dog yet... LM

MENTAL TO

Dear Lloyd,

I'm afraid I'm getting extremely mad. It's nothing to do with how the mag is presented or anything but because I've sent in two letters and only

ended up in the BEATING TOU UP Snips column. I am a very grateful reader of your magazine, but when I get mad I REVIEWED AND don't only start to buy Commodore Format, I even read it (are you sick? - LM). So '?!!'! print this letter, get the picture? (Enough threats for one letter son -Dad). Here's some questions then: (Hummppph. I hate you Dad - Son)

1) I think my brother should be in a mental home. Do you think so?

Only if he takes you with him.

2) When will Zool be coming out on the 64? When will I get a pay review?

3) Me and my mental brother had a bet on which was the best out of Heroquest and Space Crusad I said Heroquest and he said Space Crusade he's never even played it! Which do you prefer?

Neither. They're both OK, but if you want to play a proper example of the genre, get Target Games' Laser Squad or Lords of Chaos.

4) Erm, erm and another erm? Answer that if yo

What do I really look like? Answer THAT if you can!

Am I a superior games player, because on m second go on Robocod I completed it?

Did you use an Action Replay cart, I wonder...

6) Do you think Emlyn Hughes International

QUESTION OF

Dear Lloyd,

I would firstly like to congratulate you on your excellent magazine, especially your letter section. I would like to point out to readers that I know Stephen Horn (the one who thinks swearing is wrong — Issue One). Stephen is one of the lew people left in this society who never swears, has extreme moral values and believes in family traditions

Enough of that complete rubbish, I would like to ask a few questions, but since you hate numbered questions. I've lettered them!

 a) How come I saw Street Fighter 2 in my local computer shop (on 29-1-93), when in Issue Three, you stated that it hadn't been released yet?

When we said it hadn't been released, we meant in the sense that it hadn't been sent to us for review, and we'd no evidence to suggest the it was on sale, let alone completely finished.

b) Is the new Datel 3.5" disk drive any good? I've heard rumours that it has been scrapped?

Write to Brian Strain and I'm sure he'll be more than happy to help.

Soccer deserved the 58% it got in Issue Four, bearing in mind it's been so highly rated in the past?

lagree with Chris and Miles - Emlyn Hughes is vastly overrated. Neil Welsh, Preston, Lancs PS Keep up the good work:

Keep up the good work? Naturally.

PS Keep up the medication.

GONE BUT NOT FORGOTTEN

Dear Lloyd,

First let me congratulate you on such a rad mag. The Easy Lives program helps me a lot, especially as most of the listings I get from my friends don't work. With almost 70 pages in each edition, all in colour, two Reel Action tapes, about 30 reviews, competitions, your section of course, tips, listings pokes, posters, free gifts, and loads more, all for the tiny price (here in Ireland) of £3.79. I wouldn't dream of buying any other mag (if I did it wouldn't be a dream, it'd be a nightmarel). Don't take this personally, but ZZAPI was the biggest load of c"p I ever saw, so this is a BIG improvement. Now after all that, could I ask you some questions?

1) Do all full price games eventually come down to budget price?

More often than not these days.

2) I think Microprose Soccer is one of the best tootie games around. Do you?

Certainly. Ask Sensible Software (it's programmers) - they'll agree with you as well.

3) A lot of the games you review I can't find in the shops. Would the Virgin Megastore be the best place to look?

Why not order software from the Forcefield Plaza? They can offer you any game released (but not deleted) - and

they'll send it with a smile. Turn to page

c) How much memory can a C64 cartridge hold? How much does it cost to produce one?

Apparently (and don't quote me on this) a C64 cart is capable of holding up to 2000K's worth of code. I've no idea as to how much they cost to

manufacture, but what I do know is their potential hasn't been fully exploited.

d) Would the graphics and overall playability on Street Fighter 2 be better on cartridge for the C64 or on 3.5" disk? If so, would there be a chance of seeing them in the future on that particular format?

If by better graphics you mean increased resolution and colour, then you're in for some disappointment. Whereas the consoles can have special chips in their carts to improve the machines capabilities for a particular game, the C64 is stuck with the hardware it was 'born' with. However, with the extra memory additional frames of animation, music and presentation can be incorporated, resulting in a generally better game. It's highly unlikely to happen. though, and as for 3.5" disk - you must be joking!

CUTE MISTAKE

Dear Sweetie Pie, I've just read COMMODORE / FORCE Issue Five, and in particular your article 'Cute to

Sarry to tell you, but in The Great Giana Sisters review it states that you won't find anything as Mario-like unless you buy a NES - wrong. I have a C64 cassette called Mario Bros by Ocean Software II states on the bottom that Ocean are licensed users for Nintendo. It has sidesnapper lighterfly etc. and you can play either Mario or Luigi,

l agree that you won't be able to get either of these in the shops — in fact my copy of Mario Bros was bought at a local flea market, about a year ago, It's a pity these can't be obtained in the shops, or that Ocean and Rainbow Arts won't re-release them

Incidentally, I've noticed a great decline in 64 stockists a shop in Manchester only had about 20-odd titles, compared with troble that amount the

year before Also, in Salford there were five stockists, but now a mere one. Anyway, keep up the good

work. D Hall, Salford.

🧓 Oops, or as Private Eye would say, shurely shome mishtake. After consulting the feam, we've come to the conclusion that the statement was a little inaccurate, and we've stopped Miles' pocket money for the next few months as punishment. As for a possible re-release of the Great Giana Sisters, didn't you read our That Was The Game That Wasn't feature? Il you had, you'd have learnt

WOTTRIEND that Sisters was withdrawn from retail outlets after Nintendo obtained an injunction, preventing further sales. It is, in essence, a dead game you'll never see it again on the '64 (unless you're one of the lucky few who bought a copy before the legal

AGGH!
AGGASH FATTO
NOTH MY FRIENDS
SAM TO THIS?

action took place). As for the lack of C64 stockists — it's their loss. isn't it? Ignoring a user base of literally millions? They must be mad!

LM

64 for further details.

That's all for now, but keep up the good work. Sam Collins, Dublin, Ireland.

Thanks for the complements, but don't you think you're being a bit harsh on ZZAPI 64? LM

 e) If there was a really big hit on cartridge, would we see more of them produced? At the moment, there are almost a dozen games on carridge, unfortunately, they're all pretty mediocre, because none of them contain that element of brilliance that should set them out from the crowd

It's doubtful that we'll see any new C64 cart games. We can but hope...

 What type of game do you think would suit a cartridge?

Lemmings would be particularly good, as any game that's playable but requires a multiload is wasted on cassette.

I hope you can spare your valuable time to answer this fabulously naff letter. Bye.

Nicholas Hartigan, nr Faversham,

PS Have a belated Merry Christmas from all of us at Simon Langton Boys School — the school that Stephen Horn goes to.

PPS Have a belated Happy Birthday as well

Thanks — I return your sentiments with heart-felt gratitude. I'll just assume my present was lost in the post — let's hope your mystery prize isn't, eh? LM

THE PLAZA STRIP

Dear Lloyd.

Greetings. Well done for producing an excellent. varied and informative magazine. The presentation is cool, and yet the features are sufficiently indepth to maintain interest.

I've been well into my C64 for a good few years now, but I can't help feeling that games 'aren't made like they used to be. Nobody seems interested in spending much time making games lastable. Mind you, I'm not surprised that software houses are losing interest in the C64, as so many retailers no longer support the machine. As the '6 has one of the industries biggest user bases, this seems pretty short-sighted to me. Thank goodness for mail order companies!

Okay, gripe over. Just for the hell of it, I though I'd send you my top five lave games:

- 1) Lords of Midnight
- 2) Elite
- Paradroid
- 4) Project Stealth Fighter
- 5) Crazy Comets

M Shelfon, Billericay, Essex

PS How about running an occasional buyers guid for peripherals such as loysticks, cartridges, accessories_etc?

It's sad, but retail outlets do tend to turn the backs on 8-bit software these days. Despite that, there's still a great deal of reputable mall order companies and, of course, our very own Forcefield Plazal

As for buyers guides — the team have said there's a possibility, but

nothing's actually planned. As conpanies aren't really producing C64 hardwire these days, a feature would essentially cover old ground and little more. That's OK or software, but peripherals only appeal to a limited amount of our readership - or so your letters would have us believe. Can anyone prove me wrong?

NEVER-ENDING STORY

Dear Llayd

I've had my C64 for three years now, and I own loads of brilliant games, like The Last Ninja aic. However, after playing some of the games all the way through to the end I was rather annoyed | pleasantly (NOT) received a Nintendo for Christmas I finished all of the Mario games I owned. The end sequences were amazing! They were at least two minutes long each, and very rewarding. They made the sequences on Robocop and Rambow Islands look pretty dam useless. Could you please pull someone's leg and get some decent endings in games, ais CONGRATULATIONS is un-satisfactory

Please help me, as I'm very boiled with my

Mark Wilkins, Redditch

PPS Please could you take that placer hag off your head?

Putting lengthy and impressive ending sequences on games tends to iincrease the programming time — especially on the C64, where the lack of 16-bill hardware, custom chips and memory restricts what a software house can produce. Nevertheless, a mere *Congratulations* (or equivalent text message) isn't enough after weeks of play. It's just one of those thinggs. I suppose - perhaps the programmers feel that completing the game is revward enough. Or maybe not.

As for the paper bag... you must be kidding. Not only do I have a seevere aversion to photographs (of myv myself. that is), I also don't like the ideea of a characature. The paper bag staays, pal. LM

CART-ASTROPHE

Dear Lloyd,

I would like to ask you a question a about cartridges. If carts are so expensive to make, how come Sega, Nintendo, and good-only knows how many other companies that maake computers and consoles are makining carts for their machines. I don't mind waiting three minutes plus for the game to load, I, but to hear some software companies going own about the cost of producing carts makes me a sick to the teeth. If they're that expensive, whyly aren't they making tapes instead of carts for ththeir machines?

Just take the price of the carts folor their machines - £30 to £150 (bit of aren exaggeration there - LM) and pereople are still buying them. Did the software peopople give a price on how much it would cost to a produce one, and how much to buy one across th the counter. I mean they can't say there's not a didemand for

R.S.V.P

Dear Lloyd.

HELP. After the first issue of this brilliant mag I was forced to write to you, including an SAE for your reply on the questions I asked. For the last four months I've purchased your mag and eagerly turned to the letter pages, and what do I find? NOTHING. Each day as the post arrives I rush to see what has arrived - again, nothing.

I'm a born-again C64 user at the age of thirty three. But dismay, all I can find are programs and games for quick fingered twelve to sixteen year olds; this wasn't the case when I first purchased a C64 in 1984. Not only did the adventure games seem better, they were more down-to-earth.

To get to the point, I'm looking for some older games, but until now I've been unable to find them. I'm looking for the following... High Flyer, Thunderbirds (both copies), FS II (Ilight sim) and Kennedy Approach.

Can you please help?

Philip John Holloway, Folkestone, Kent

Unfortunately (and I'm sure I've mentioned this before), I don't have the time to send personal replies. I hope this answer will suffice...

I must agree with your point on software — the standards (and amount) of in-depth games have gone downhill tremendously in recent years. However, if you want to find the games you mentioned (and perhaps a few others) perhaps you ought to get in touch with Capri Marketing. You'll find their address in 'Back to the Feature' this month, along with some particularly well-written lext. Or so James would have me believe ...

C64 games, if they be on tape or cart. From reading your mag, you have C64 users writing from as far as Denmark, Finland, Germany, New Zealand, and even your man from the North Pole has wrote to you. So they can't say there's not a demand out there for carts. Would the cart improve the graphics

BORDERLINE BLASPHEME

Dear Lloyd.

Nice to see you're back in the saddle after the 'Bash and Lash' section. Anyway, back to my questions and queries. I used to own a fabulous game by Gremlin Graphics called Thing on a Spring. Please could you tell me if Gremlin are ever going to re-release it again, or if it's still available now? I think it received a Zzapl Sizzler when it was released. How about putting it on a covertape? Also, where's the Scorelord gone? I've been busy amounting high scores all month but there's nowhere to send them. Now for the serious bit! When I was a lad (way back in 1984), I also owned an Amstrad + and a Spectrum - why is it that these two 8-bit machines are now dead? Okay, so the

NOT SO

Dear LM. got April's COMMODORE FORCE magazine and on the front there were two tapes. One had Trolls on it and Easy Lives. Easy Lives is on after Trolls. I had to go and load right through Trolls to get to Easy Lives, but when it loaded I got an option screen When you pick one of the games it says eternity lives and energy, then it says go and rewind the tape to the beginning and

and make gameplay any better on the C64? Are we better off waiting 3 minutes plus for a tape to load?

David O'Sullivan, Co Kildare, Ireland PS Can't buy the Action Replay cart over here or Rick Dangerous 2.

I think I've already answered your questions - albiet indirectly - elsewhere this Issue. However, C64 carts are particularly less expensive than their consol equivalents, so there's less profit to be made and more hassle with production.

As for your point about using a tape recorder with a console - write to Brian Strain and ask him why you can't (or rather, why it'd be impractical). I'm sure he'll be pleased to answer ...

OH YES! NOT 'ARF! WRITE TO ME AT THE USUAL ADDRESS FOR ALL THE STUFF THAT BAGHEAD CAN'T ANSWER!

Spectrum's graphics and sound weren exactly great, but it was the pioneer of bit's, and the Amstrad was very

reasonable (dare I say II, but some of the games were slightly better than the C64 versions) The C64 seems to have outlived all of them. Finally, now that Hewson have gone bust, when

can I get hold of a copy of Zynaps? Sorry about the stat of my writing but I'm in a rush to go out and ca

my gira! Please pri

my letter and answer my questions. I know it's bit long, but I've just never gol round to asking these quustions.

Pete Lavers, Taunton, Somerset

pless fire when ready. Then, after pressing fire, it says press play on tape recorder. When I do this, I end up playing Trolls again. s my tape faulty?

Martin Whitworth, Manchester

Do I really have to answer this? Need I explain how to use the Easy Lives program, what it does and what it doesn't? I know the education system's gone down the tubes since my time, but this is ridiculous.

A mystery prize will be offered for the best answer to Mr Whitworth's 'question'.

All my friends think the C64 is dead. I think it is because they don't have one, please tell them who is right.

PARASOL STARS, TOO ...

HI There Forcers. I'm hoping to get this printed 'cos I've wrote on other gittin occasions, but never got it printed. The mag's great and I own every issue.

My first point is concerning Chuck Rock, I've been trying to get hold of this game since it was reviewed in ZZAPI back in July 92. It's now, at the

time of writing, the end of March, and I ask in computer shops and they still say 'it's not been released yet'. What the hell has happened? Surely they've not done another Parasol Stars and decided not to release it?

To the best of my knowledge, it should be available as we speak.

Could you please tell me the best

carridge game on the good of C64, 'cos I'm

thinking of buying one. I've heard a rumour about Chuck Rock 2 coming out, and the first one isn't even on the C64 yet! That long haired herbert Miles Guttery is maybe a great guy, but in his cutsie game round up in Issue Four, he was slightly harsh on Turbo the Tortoise a great game, 85% is more like

It's all a matter of opinion. Miles doesn't like it that much — you do. Fair enough?

Will there ever be a Stain Osborne fan club? I'll be the first member. Where's me old pal fatty Phil King gone? He

was a great guy. If I win Wet Kipper of the Month, I'll celebrate by eating one for my teal

> A Stain fan club? Heaven forbid you almost got the Kipper for offering your support to such a hellish possibility. Phil's now

> > brakes on the

Editor of our sister

very serious offence, and although we like to have a bit of a laugh and a loke, we don't condone or approve of it. After all, you spill most of it anyway....

IF I EVER CATCH UP

WITH THAT GUTTERY **GUTSO I'LL HAVE** HIS GUTS FOR GARTERS, THE **HUMAN SCUMOID!**

You'll be very, viery lucky to find a copy of Thing on a Spring or Zynaps - unless you find a decent market stall (or equivalent), I'd say you've next to no chance. The Scorelord is, I'm alraid to say, sulkling back on his home planet. You see, allthough Miles looks harmless, he really can't stand being beaten at Cluedo, and so he severed the

you buy it, if just to read his writing again. Keep up the good work, and anyone who hasn't got Rainbow Island's - buy it now, 'cos it's great!

magazine, AMIGA FORCE - I recommend

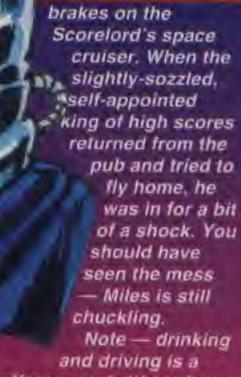

James Davies, Hyde, Cheshire PS Football Manager was excellent, more of the same please.

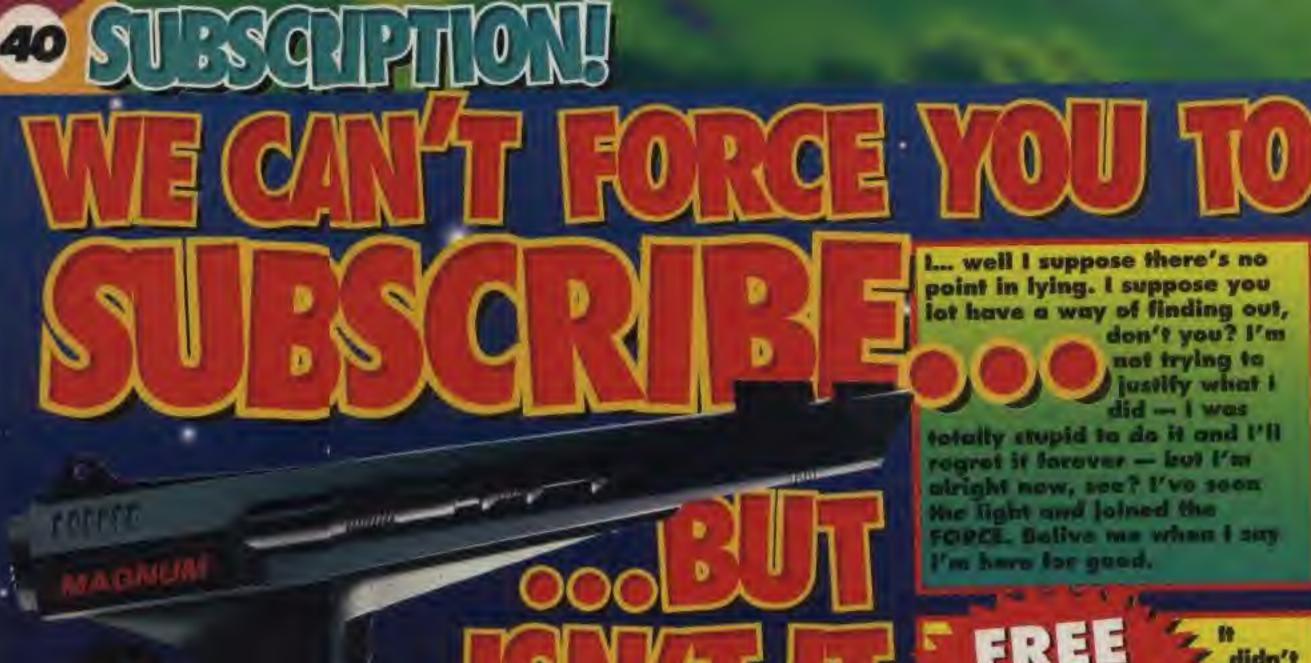

We're glad you liked Football Manager we aim to please. Look out for a few more classics in forthcoming issues.

I'm getting quite concerned with the hot weather - not because of the onslaught of wasps it brings, but because breathing in this paper bag becomes increasingly difficult! Still, at least I don't have to go to the beach to get a tan - my bag provides the perfect healthy-look colour aiready!

Want to write to me? Then take note of this address: Mangram's Mailbag, COMMODORE FORCE, Impact Magazines, Ludlow, Shropshire, SY8 1JW.

COMMODORE

Tick where appropriate.

Okay, you've got me. I can't get by without my monthly helping of COMMODORE FORCE and I don't want to risk missing it at the newsagents. Also, I want to save a bit of cash too — it's cheaper in the long run, you know!

that scream!). Then I'm off strutting round the office with a smug grin on my face at anyone else with a nasty bug — well, they do it to me!

Throw in a few typing mistakes, the odd logical bug, stir for a while and you can get in a right mass unless you keep on top of the situation

Like most games these days Batman Returns was written to a light spec (specification). Long before work got underway on the game itself, a detailed document was drawn up describing what the game was actually going to involve

We started with the script of the film (the movie wasn't even out then) and picked out the juiciest bits for a platform belat-em-up style game. To see the script (which has Top Secret plastered all over it), you have to sign a confidentiality contract. If one snift of it gets out reven to your best mate), you have to read Commodore Format for the rest of your life!

We also produced the video for a fun night in, so myself. John (Amiga programmer) and Ally (Amiga graphics) went sat down to watch it. With an all-expenses-paid bucklet of Kentucky Fried Chicken

each (yum) we sat down ready to make notes

The film, pretty obviously, followed the script but as it turned out, we were too busy stuffing our faces to make any notes! When it finished, we discussed our favourité bits and what we each wanted to implement in the game.

Some of the finer points still needed to be sorted out between the programmers and artists before the game itself could be started. What moves would Batman have? How big would be be? How many solours would be use? Who killed JFK? Why do smelly socks always stay under the bed?

We decided that to get Batman looking good he'd have to be two sprites tall and two wide. Using multicoloured sprites would only allow us three colours and the pixels would be really chunky. This proved a bit restricting for the artists who like to have lots of colours involving clever things with shading (so they say) and small pixels to cram in the details. As I was feeling generous. I told Paul (C64 graphics) he could have a hi-res sprite overlay for each of the multicoloured ones. After Paul had raced off to get his feeth into the graphics. I did a few sums and came to the

horritying realisation that Batman was going to up 8 sprites! Oops, oops and triple cops!

The solution was to multiplex the sprites changing and defining them and consequently fooling the VIC chip. As far as the chip is concerned, Batman uses eight sprites but in tellive still got four remaining (tee-nee)!

State of the artists

Artists are wildly extravagant with animation 'phases'. Most games use four (only two in the old days) different drawings of the main chara running, but Batman uses eight to make him to smooth and sophisticated.

In life there's always a price to pay, and in it case it's memory. To figure out the total amountemory used the number of phases (eight) a multiplied by the number of 64 (the number of bytes each sprite uses) which equals 512 byte that's 1/2k!

With Batman taking up over 17k. I'll let you out how many phases he uses

The VIC chip can only use 16k of Rem at a so the next problem involved cramming the ca

driven adventure on the '64. It's a genre that's been swamped on the 16-bit machines in recent years, but rarely repeated successfully on the Commodore 64 (Elvira 2 being a

notable exception).
Next up they opted for a totally different approach, with even more astounding success. Ocean

Yeah, like

Yeah, like let's steal the sign. It'll look great on the office wall, don't you think? snapped up a seemingly curious license — that of pop group Frankie Goes To Hollywood — and no one knew what to expect of the end product. As if turned out, the Frankie

game dumfounded everybody when released and fully deserved it's 97% rating.

How, then, could they possibly follow these with equal success?

The answer came in the form of a follow-up to Shadowfire, continuing the adventures of the Enigma Team (heroes of the first game) called Enigma Force. Many of the original's elements were carried across along with several new ideas. For instance, the top part of the screen was replaced by an animated play area where you could see the action unfolding. In fact, you could even take 'hands on' control of your characters, and play the game as a shoot-'em-

up/arcade adventure. But still, the best was yet to come...

An all-time classic emerged at the middle of '87. The Great Esc was a wonderfully engrossing at atmospheric isometric adventure during WW2. Graphically excelle and with many possible escape routes, this kept many a person occupied for many an hour.

The Great Escape's design enwas later used on the far larger, more involved, Where Time Stor Still — a great game which, thou appearing on the Amstrad and Spectrum, inexplicably never mato the C64.

After years of innovative and

C-FORCE No.8 = AUGUST 1

crusader into the sprite memory. The answer was to copy the right phase into some blank sprite slots every time he animates. Not too tricky in itself, but Batman still faced in only one direction (if would have taken 34k to face both left and right!) Now I had to mirror each byte of data before re-ordering

Several nervous breakdowns later, and there he was running, punching kicking, jumping etc... hurrah!

and moving them into the sprite slots.

The big job

The next big job was the background scroll, moving every character on the screen either left or right — dead easy. The hard part was filling up the edge of the screen with more characters (people are over-fussy if you ask me).

Paul was plugging away at the background graphics and it would have been hard to get too excited over the silly blobs that were moving about but I knew it worked and that was good enough for me.

Batman Returns is to be a beat-em-up right? So where are the baddies? Well that was the next thing on the agenda. Animating them wasn't too much trouble, but you wouldn't be particularly worned by a baddy who wandered aimlessly about the screen now, would you? I needed to give them brains — the acrobats had to know when to jump up to get Batman and when to duck a punch. They needed to know where Batman was and what he was up to There's no 'cheating', they won't duck a punch until they see it coming and they've all got reaction times it can't be too easy though, otherwise you'd race through the game first time.

Getting this balance just right is time consuming, as every time you change (or tweak) one thing, something else needs adjusting. If I change the running speed of Batman I have to change the speed of the clowns too, so you can't just run away (not that someone as brave as you would). This part of programming starts when you've got something on the screen and stops when the game is in the shops (with short breaks for eating and sleeping.

which us programmers are occasionally allowed).

Level One and Two are completed (except for tweaking) — or are they? There's still the little matter of the status to do. Ah, that wonderful bar across the bottom of the screen! You've got to know a lot of stuff to really get on with bashing those baddies and making Gotham safe for all the decent law-abiding citizens (as if you care!).

Lives, strength, combat mode and, most importantly of all, your score all need to be displayed. Up until the graphics arrived this was my 'monitor'—a programmer's greatest ally in the fight against the evil bug. Bold white text on a dark grey background (scrumptious!) that tells me everything I need to know. Batman's position in the map helped me type in the collision data for the platforms and power-ups. When the biker steadfastly refused to make an

appearance. I could find out where he was and what he was doing.

WHO'S PROGRAMMING WHAT?

ust in case you were wondering. Denton Designs is run by Ally Noble (Director, art person) and John Heap (Director, person) and John Heap (Director, programming person). There's Roy Bannon of course (Programmer, C64), and Paul Salmon, and music respectively. Oh, yeah — the and music respectively. Oh, yeah — the photographs of the team were taken by a photographs of the team were taken by a talented fellow called Paul Hamboeton, so many thanks must go to him.

The information shown was of no use for playing the game, and i'll admit it didn't look too hot (it was a nice colour combination though) so more graphics were required by Parand extra coding from me too. For a start, my monitor shows all it's numbers in

hexidecimal and as "I've just got a score of 2CF!" isn't going to impress your mum. I thought I'd better put it up in decimal. A score which counts up i so much more fun too, especially when you pick up the multiplier bonus!

Hang on, what's happened to my monitor? Well the truth is it's still there — well all the code is. Whenever I need it, all I do is change a flag (called monitor!!) from 0 to 1 then assemble my code and there it is — clever stuff! It all got a bit tiresome when I had a bug in my status. but that's another story

So, level three is next, and it's multidirectional so new scroll routine is needed. New baddies need to go in, most notably Catwoman (ooh, tight leather suits and all that!) so there's plenty to be getting on with while the graphics are being drawn. Where's Paul got too. ?

Key Bannan

original products. Dention turned their hand to the sports sim fratemity and teamed up with Audiogenic. With the Rugby Union World Cuip in full swing, a swarm of computer rugger efforts were expected. In the end, it turned out to be no more than a trickle. Rugby had never been brought to the

computer scene with much success, so hopes were none too high. Denton, however, defied all and came up trumps again. Combining basic management elements with exceptionally-playable arcade action, different plays, easy to master passing, rucks and scrummages

World Class

Rugby was a finely tuned representation of the sport which, incidentally, blew the official licensed game out of the contemporary fishpond.

So, with many legendary titles to their credit, rest assured that the upcoming mega-movie tie-in Batmar Returns will be something to watch out for. Want to know more? Well, perhaps you'd better listen to Roy Bannon. He's the programmer, and knows everything there is to know about madness, bugs and demanding artists.

Below: Ally, Jon and Roy decide to hide behind a pillar. Only the offer of cups of coffe and sticky buns could entice them away to finish the Diary.

EXCLUSIVE FLASHBACK REVIEW S FACE PUZZLE ROUND-UP MOR

• Kixx, £3.99 Cassette, £5.99 Disk

Serve the public trust, protect the innocent, swim in tight circles around a tacky plastic castle. Do robotic police and goldfish mix? IAN 'FAIRGROUND PRIZE' OSBORNE dives in...

 Robocod is inundated with great graphics, all colourful and fitting the cutsey theme. Pond himself is well animated, cheekily wadding about the various toy-like backgrounds. But (i dislike that word), in the world of software there's always an amount of water to be hurled onto the fire. Robocod's faults are not extensive but, all the same, do mar the gameplay somewhat. Moving platforms don't always look like they're moving, leading to disorientated jumps and plummeting somewhere you'd rather not be - usually back to the start! The tape multiload is boringly big, but there's a price to pay for the most luxurious of goods, and extensive tape access seems a way of life these days. Gripes apart, it's a sound investment.

spent ages looking through our disk boxes. for Robocod, simply because I forgot about the James Pond 2 bit and assumed it was filed under 'R'. Come to think of it, it might as well be - it's a great game, and nothing like James Pond — Underwater Agent. which never made it to the C64 anyway.

That's enough about my problems, let's look at the game. You control our piscine pal over nine levels of non-stop platform action. The plot involves the usual dribble about an evil megalomaniac stealing the world's toy supply, and Mr Pond being the only one who can save the day. He seems guile partial to Penguin biscuits too - the scenery is full of em, and they also feature heavily on the pregame intro. A sponsorship deal, perhaps?

got a few distinctly un-fish-like tricks under his tin The boffins at mission HQ have given him a

wacky piece of menswear, the aptly-name Expandosuit111. It contains built-in. artificial gills so he can breathe out of water, is impact-resistant for sturdy protection and — best of all — it allows Jim to stretch vertically to reach higher platforms and, by hanging on with his flippers, move along underneath them This is no mere gimmick - certain hazards can only be traversed by utilising this method.

Needless to say this hyper piece of hardware isn't without its drawbacks. Like many of the toys he's rescuing, Robocod's suit is battery powered. Every time he collides with an enemy, the cells are drained; three hits, and

CALLELLIE

Chick chick chick chick chick chick chicken, lay a little egg for me. Darn, wrong song. Oh well... It was a nice tuna all the same.

Pond loses a life. Current power is indicated in the guise of a battery at the bottom-left of the screen, and any lives remaining are displayed as tingers on the aquatic ones hand.

Abandoned Plaices

A corking conversion of the Megadrive original, Robocod just oozes colour. The levels themselves are littered with outsized toys - of Jim finds himself pounding over ping-pong bats, treking across trainers, galloping over golf clubs and generally making out like a kid in Toys-R-Us. Guarding the collectables are a number of wierd. and wonderful baddles - watch out for Bertie Bassett-type characters, birds with playing cards for wings, rougue teddy bears, etc. Obviously, the backdrops aren't the Megadrive's detailed colour piccys (to have used them on the C64 would've slowed the game drastically), but the stripey wallpaper effect is an adequate replacement. indeed, the overall graphic standard is very high, with a cute little James Pond roving around detailed landscapes, but losing not an ounce of clarity in the process.

It's not all plain sailing, however.

Did you know that fish, like the team, have teen second memories? Secondly, the team, like fish, have ten...

Because of the lack of backdrop detail, it's often difficult to judge horizontal movement when on a mobile platform — the computer knows you're moving, but because the background consists of horizontal stripes, it's often impossible to tell whether or not you're moving. This is compounded by the need to make leaps into the dark, hoping there's something underneath to land on. You can't even use your stretching lacility when on the move, as this would be impossible to program. Also, despite its strong use of themes for each level, the game can appear characteriess at times; it's world seeming very contrived.

Not that this makes it a bad game of course, as even with the occasional fault it's still one of the spookiest budget platformers around. The multipad will hassle tape users considerably, but on disk it's a breeze — congratulations to Kixx for putting it out on both formats!

This is no plaice for a fish; luckily, our hero has a stretchy bottom for those hectic moments. What a guy!

SOMETHING FISHY AFOOT IN THE ARC

In this instance, I'd recomend they change their

Are all demons wicked spirits with evil intentions? CHRIS 'DEMON-STRATOR' **HAYWARD** speaks out on their behalf...

essing with the occult is a risky affair. Many a horror film has concentrated on people partaking in rituals and suffering the concequences when incantations go wrong Anthrax was such a mortal to end up along this fateful path. As well as being named after a thrash band and a sheep-related disease. Anthrax decided to summon a demon, and use it to destroy the King. and gain the throne for himself. So, one night, after several mantras had been chanted, and a box of candles lit 'rax decided to dabble in the black arts. Being a little on the inexperienced side, though, Anthrax forgot one vital precaution — to look under the bed. The next minute, a large Demon and a host of menacing imps had reduced him to a smouldering pile of ash. Of course, the Demon didn't stick around to make luneral arrangements. Instead, he roamed off into town and occupied himself by destroying the entire kingdom

A few years on, and the kingdom was rebuilt from scratch. However, one minor problem (and one detail left out of estate agent's sales talk) was the Demon.

who slept underneath it all. When the populace was overflowing once more, the evil one decided it time to wake and get a glass of water

So where do you fit into this? Amazingly (or should that be predictably) enough, you're a brave warner with a huge sword and the intention of marrying the king's daughter - a possibility should you kill the Demon, as requested by the king himself

Demonic good looks...

Wrath Of The Demon is an eight-level arcade-style game with a variety of stages. The first level seats you on the back of horse, against a gorgeous parallax background. Flying minions must be punched and potions must be scooped from the ground - all whilst steering your steed over many dangerous obstacles. This is followed by a single screen beat-em-up, where two annoying goblins need battering with your sword. Additional help comes in the form of potions, accessed by pausing the game and changing the colour of the border, with each different colour corresponding to a separate spell. Later levels include a horizontally scrolling. hack-'em-up stage - it's graphically sound and will appeal to mappers. In fact, the majority of the levels contain stunning graphics, with some large, fearsome baddies, superbly animated and sploshed O'He knows when you are sleeping, he knows when you're awake. He knows

men you've been good or had, so be good for goodness sake'. Santa Claus - kindly old elf, or CIA spook? Darn,

with colour. The vanety between theim keeps your interest fresh. although the early horse riding lark is initially fun, but it's length soon converts your way of thimking.

Despite the game's obvious graphical excellence (enforced by decent inbetween-level screens), the playability veers on the sparce side - often. Control

Below: 'Eeeh, look at me feet. They're red raw. I walk ten flaming miles to get me shopping, and no-one appreclates me'.

of the hero proves to be very unresponsive at times: It's especially tiresome on the single-screen lights. where timing is of the essence. Whether it'll fare well as far as lastability's concerned is

 Wrath of the Demon reminds me of a girl I spent

a few years dreaming about in school. She looked fantastic, but I was so disappointed when I eventually got to speak to her, as it turned out she had all the charm, wit and personality of an ironing board.

Well, OK - perhaps Wrath isn't that bad, but it's certainly lacking in areas. The various sub-levels are, while initially impressive, too fiddly and somehow, they don't seem to 'glue' together.

The multiload's hardly the most friendly one I've come across either, with the disk version being slow in places, and the cassette... need I say more?

Wrath's a game you're going to have to try yourself. No matter how much we recommend it (or via other means) it all boils down to the fact that If

questionable, but even with infinite continues. I doubt it, as battling the minions does require a sizeable amount of patience. My real criticism is that there's a multiload that's massive on disk alone - get yourself some strong cups of coffee if you're a cassette user

It's not all bad, bad, bad but if it played as well as it looked, it could earn the Hurricane Hit accolade. At the end of the day, there's just not enough

'He flies through the air with the greatest of ease, that daring young IAN 'SKY HIGH' OSBORNE in his can of sweet peas'... Well it rhymes, what more do you want?

curious one, this. It was left out of Issue Four's flight sim round up cos you view the plane from behind and not within, but was this a little harsh? The plane handles realistically, the cockpit controls are accurately reproduced and (in the best flight sim tradition) the keyboard's used as well as your trusty joystick. A first-person perspective would make the sim's aerial gymnastics hellishly confusing, so Microprose were wise to use the external view — sorry Miles and Chris, but personally, I think Acrojel IS a flight sim, albiet a very unusual one.

Let's start at the beginning. Acrojet simulates the BD5-J, a highly manoeuvrable one-man jet capable of speeds of over 200mph. Unlike most computer flight sims, you're not asked to fly deep into enemy territory and smash seven shades of shrapnel out of various pieces of military hardware. Instead, a series of sporting

Roll, Pylon Race, Slalom, Cuban Eight and the Spot Landing. Each event is graded according to difficulty, and on completion marked out of a possible 9.9. You can attempt a single event, a pentathlon (a series of five), or for the real high-flyers, the decathlon (all ten), and can alter wind affects and aircraft performance to your liking. If you want to get used to the plane without mucking about with take-offs and landings, there's an option to start the event already in the air.

The Plane Truth

As mentioned earlier, the plane itself handles very well. When banking, if won't 'lock' at a certain

AEROBATICS DISPLAY; Shows your position and gives a lowdown on the event. Keep on the green line!

CALLELLES

angle, preventing the player turning it upside down and possibly crashing — this is a serious simulation, not Afterburner. A banking plane gains less lift from the wings, and so loses height. Again, this is faithfully reproduced, though not quite as convincing while playing on the easiest difficulty setting. As any pilot knows, the quickest way to lose height is to turn the wings vertically to the

ground, offering virtually no lift at all. Again, this is catered for. Even on the easy level the engines blow if you drive them too hard, and watch your fuel — mess around too long and the tanks run dryl

The events themselves might not look too

interesting from the ground (flying 'round four pylons then back to base? Tish...), but guiding the craft along the intended flight line is a real challenge. Keep an eye on the radar, and watch your compass too — like a real pilot, one eye needs to be kept on the instrument panel, or you do something daft like landing with the undercarriage

exploding. Still, it's just as weedy.

Like most games, Acrojet is far from perfect. The main sprite can get a little unclear at times and having to load every event separately is a real pain, but this doesn't stop it being a real

high-flyer. It's not to everyone's tastes, but the bite-sized aerial gymnastic events and on-screen aircraft offer greater immediacy and accessibility

than a militarybased flight sim:

I happen to be rather partial to a nice flight sim on toast for brekkies now and again, but Acrojet isn't really my glass of freshly squeezed orange juice. It's graphics are, at times, confusing, Occasionally finding yourself in an inverted dive for no apparent reason is quite off-putting. and I didn't find mastering the events all that rewarding. Still, varied difficulty settings help ease you into the game even though the plane handles more like an airbus than a highly-manoeuvrable stunt jet. In any case, I s'pose it makes a change from all those military jobs. Suck

I wonder what this button does', thoughtGeraid. Before he knew it, he was up, up and away in his amazing flying machine. Later, in intensive care, he took the time to think 'yes, maybe I SHOULD have had a few lessons first'. Silly boy...

THE YNGIE COLEGION

Binary Zone PD, £6 Cassette & Disk

So you think all SEUCK games look the same? Here's the collection to prove you wrong — IAN 'DIE ALIEN SCUM' OSBORNE checks out a stunning selection of seasoned sizzlers...

In trouble with ace utilities like the ShootEm-Up Construction Kit is they allow talentless twerps to program indiculously inept offerings. This wouldn't be so bad if they did it purely for their own amusement, but many think their sad excuse for a game's good enough for the covertape — some of the rubblish we've seen at COMMODORE FORCE would make your hair curl! No such problem here though. All Yngve is the master of SEUCK, and this 21-game PD compilation (with an interview with the man himself thrown in) is a real bargain for connocations of brillo blasters.

SELICK can handle two variations of vertical scrolling (auto-scroll at two speeds or push-scroll) and a static screen. All's not too food of single-screeners, but he's used all of the scrolling routines.

DISCOUNT!

The Alf Yngve Collection coists a mere £6, but if you use our exclusive discount coupon, you can get it for a fiver! That's less than 25p a game.

Send cheques/PO's for £5, payable to Binary Zone PD to the following address:

Binary Zone PD, 34 Portland Road, Droltwich, Worcestershire WR9 70W.

Please send me a copy of The Alf Yngve Collection.

Cassette

M Note: If you don't want to mutilate your mag, feel free to seed a photocopy

 often combining more than one in a game. For example Laser Leigun starts on a static screen.

but after a certain length of time you scroll upwards. The John Wells enhanced Twin Tigers auto-scrolls at two

different speeds, but, despite excellent graphics and presentation, this particular game suffers from too little to do. It's worth a look nonetheless.

SEUCK it and see

Likewise, you're not restricted to licience fiction or army games. Check out Router's World — a cutsie

featuring a bouncing smiley-tace as the main spirite, and bubbles for bullets. For a cool and original game try Nervana, where a Buddhist monk flies through the clouds in the lotus position, blasting the heads off fire-breathing demons with yings formers has for

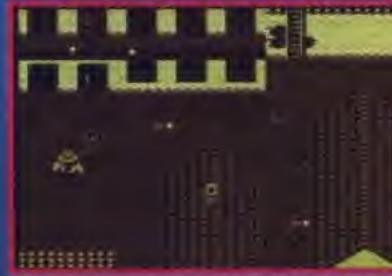

shoot-um-up

yang symbols. This he good you can forgive him for mis-spelling it!

There's a fair few 'Inbutes' to existing games too Hover Raider's. River Raid for the '90s. — a hovercraft with attitude blasting all manner of aquatic enemies. There aren't too many on screen foes at a time, but the spendy scrolling and restricted screen area means if you don't pick your shots carefully, you won't live to regret it.

HOVER RAIDER — Another blinding blast, this time in the River Raid mould.

Banana Jones's whip doesn't reach as far as lenemy's bullets, so if he's to survive in the 'Tempor the Goons' he'll need all his wits about him Guerilla is basically a SEUCKed Commando do — it's nothing original but very well executed. There's nothing unoriginal about The Swiss Connection though — an idpine gams where you guide a skier through a wooded landscape reminiscent of Epyx's. The Games — Winter Edition, but with baddios trying to blast you off the piste.

QUERILLA — The crons ranger rides again (but where's the motorbike?)

There's no way we can cover all games on a mere page, but rest assured The All Yngve Collection covers all manner of themes, and every conservable device possible through SEUCK. The contain the usual drawbacks associated with this utility. There are no power-ups, no horizontal scrollers and a screen-stop can only hold the gan for a set time — basically, until you've dispatched this foes. Even so, Alf's game designs, lift them of the ordinary. The majority of them feature great graphics, ace animation and credible construction What more can I say but 'buy It'?

1086. It's a your unremarkable in it's historic content. For example, no-one was executed, there was little in the way of scandals and even the Royal Family were on their best behaviour. One thing that was over interesting, hoppening and going places was the C64 - well, apparently. Me? I was a mere spreg. However, I hadn's discovered the joys of relationships, going out and other such

stuff, so my '64 was pretty essential. Oh well, on with the feature. Enjoy.

uperheroes may have fought on top of them. and a few desperate souls have misguidedly jumped off them, but never before have the tops of buildings played such an integral part in a computer game, as they did back in '86. Gremlin Graphics' Bounder launched it's way onto the C64, and the horizontally-scrolling mayhem it offered endeared it to both gamesplayers and reviewers alike. The concept was simple; progressing through various levels, you'd have to

Oh no — a caption for a game with balls in it. The game's great, by the way.

Olt's a tennis ball with a face!

route. Ideally, this would be one that didn involve plummeting thousands of feet down to the ground. Using skyscrapers as platforms. you'd attempt to complete the sections and collect every conceivable bonus. It was a strange idea by all accounts, but one that worked - ever if the star of the show didn't grunt like Monica

quide

your tennis

ball on a sate

Seles. Geoff Crammond's Revs squeezed more than a passing recommendation in it's reviews, as it retained nearly everything that made it such a hit on the BBC micro. The C64 had been crying out for a decent (but detailed) racing sim - this comprehensive effort gave all that and more. Despite it's age, Revs still looks and plays well: a pity (in a way), as it's all but unavailable,

 Yeah, it may be fast, but it's not as nippy as Miles' car. Er, like honest!

Commodore Simulation?

BMX Simulator was an early CodeMusters release, and was preated by a mixed recaption. Basically Supersonnt on bikes, it included tricky races and a two player option to make a moderately satisfying race game.

was particularly surprised to find that CodeMasters have converted and released it for the NESI Yep, a C64 game of yester-year is currently doing the rounds on a console, as part of a four-game compilation. Sadly, it's a dull game, but I suppose the NES couldn't cope with much more - I'd like them try and do First Samurai...

The subject of computer pomography and horior really seems to raise the blood pressure of certain individuals. At the time of writing, the tabloid newspapers are hailing computer games as the new Salan, after the reliease of Night Trap on the Mega CD. If you don't know about the game, then you won't know that it involves saving a group of leeriage girls from being, as one paper put it. drilled through the neck and mutilated

The problem lies in the fact that Night Trap uses actual video footage for the gameplay - in fact. it's rather like an interactive movie. The real irony of the situation is that it's useless! A bland plot and contrived scenes make for uninteresting and repetitive action — and all the potential that the CD offers is wasted. You may wonder where this is leading, after all, consolles are only

usually mentioned on time letters pages, where theey're frequently condemned.

Well, many people think the instance I've just explained is a new thing, but it happened im 1986 loo, when Domarkk released Friday the 13th A series of grazzly ads suggested a goreheavy computer game, rand I think most people were curiouss as to how it'd turn out. The end ressult was laughable; it's ndiculous semi-3D landsscapes were a joke, the digitised 'screams' a baddly sampled gimmick, and the gameplay was terribole. Coming from the days when **Domark**'s releasee standard was questionable, it was a trirue horror game — but not quite in the way they intdended...

Obtaining the rights too Ridley Scott's classic flim, Blade Runner, posed a real problem for CRL the complexities involveed were too huge for a licence to be feasible. Innstead, they purchased the rights to the movie's Vanngelis soundtrack, called... Blade Runner! The gamneplay and plot bore more than a passing resemblalance to the film, but it was a shame the game didn'n't turn out as well as it could have.

The action involved chase sequences along busy streets, as you attempted to 'retire' assorted Replidroids (the big-screen equivalents were called

Replicants). Unfortunately, the awful collision detection made it a trustrating and laborious outing - the only thing you gained from extensive play, was knowledge of how many expletives you could fit into a sentence.

In the ring...

Speaking of obscenities Melbourne House's Rock and Wrestle was an early attempt at bringing in-the-ring action to all those Big Daddy and Giant Haystacks lans. From the days when Hulk Hogan meant nothing to your average bod on the street, it gave you a host of moves to utilise all from the comfort of your own home and without a sweaty armoil in your face. The problem (there always is one, isn't there?), is that the 'sport' is essentially not convertible; in fact, I'd say it's one best left alone, and Rock and Wrestle suffered accordingly. There wasn't really that much 'rock' either; the game offered a few 'tunes' to complement the action, but they were

nothing special.

Steve Crow's classic arcade adventure, Starquake (released by Bubble Bus) included all the better elements from the classic Ultimate games, while having a few tricks of it's own. Rather than jumping around the flick screens, the oddly-shaped hero could build platforms or commandeer flying pads to climb higher and travel. However, the platforms disintegrated fairly quickly, and you only had a limited supply of them; also,

travel by pad was restricted in that you could only park in a designated area - and while on one, you couldn't pick up objects. It was impressively designed to make things tricky and challenging, but by no means impossible - an aspect woefully ignored a little too often in otherwise excellent software.

A platform game without jumping? Amazingly, Starquake's still excellent.

Bubble Bus

Reel Action

MAD

You're probably itching to get your hands on these games, aren't you? Well, to give you a helping hand, we've (as last month) put together a list. Good luck and happy hunting...

Shall we dance,

m dear?

e show you just how well the classics of 1986 compare against recent releases, where to obtain them (if possible), as we as a few choice comments, we've constructed this table. Basically, it goes as follows:

- Game Name.
- Publisher.
- Typical Mark of it's time.
- Force Factor (how we'd rate it these days).
- Availability.

For Availability, we've estimated how easy (or difficult) It'd be to find the game. This is a rating out of ten, with seven to ten being readily available, four to six being through mail order, and one to three being .. well, good luck is all we can say. Enjoy - and if you don't, we'll send Miles around to tell you about his new. girlfriend, Chris' love life is, in comparison, fantastically interesting

'n' Wrestle

I don't like computer wre estling games - and I doub! I ever will,

Excellent platform bash i Definitely worth a look.

The sequel to Finders Kelepers, and equally as good — if not better

I you haven't got it, get C COMMODORE FORCE, Issue Seven

Melbourne House 53% 43% 1/10 1/10 93% 87%

1/10 94% 85%

98% 10/10 98%

The sequel to Finders Keepers (leatured last issue) had an additional pound on it's (still meagre) cost, bringing it to £2.99. Released on the MAD (Masterfronic Added Dimension) label, it was superior to that of many full price releases of the time. It took all the better elements of it's predecessor, and added larger, detailed graphics. more involved puzzles and a host of neat touches - and all for less than a trip to the cinema. The characters, and the interaction with them was also a novel touch — keeping everyone alive and happy played an integral part in completing the game.

dizzy, our covertape's spinning...

Every now and then, a true classic may appear almost from nowhere, stunning everyone who's fortunate enough to experience it. Spindizzy is one of the few games to deserve this title, and if you were clever enough to buy last issue you'll have it in your possession. If you didn't get it, perhaps you

bught to order a back issue now the ZZAPI reviewers weren't joking when they awarded it a phenomenal 98° ., you know ...

Cairlight

Bo Jangborg's Fairlight took the arcade adventure genre into another dimension. Whereas previous isometric games of this type (such as Knight Lore and Alien 8) had utilised rooms of the same shape with sparse decor, Fairlight thed, and pretty much succeeded, in recreating more realistic areas, buildings and furnishing. This wasn't without it's drawbacks though - the game was a little on the slow side — but the undenlable quality of the puzzles, and the freedom it's world offered, more than compensated for the lack of pace.

Hype and computer games seem to go hand-inhand at times, although, arguably, anyone stupid enough to buy software without searching for proper recommendation almost deserve to lose their money on a useless game. One case in which that opinion fell down concerned the summer release of World Cup Carnival, US Gold's official licence of the 1986 World Cup was eagerly awaited by C64-owning football fans everywhere. Eventually it arrived — although sadly, it didn't live up to the standards it's publicity and excellent packaging might have suggested.

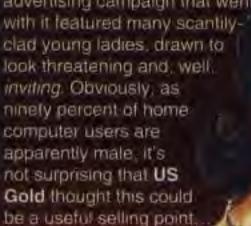

Possibly the worst part was that it wasn't an original game — the producers had took Arctic's diabolical World Cup 2 and given it a face-lift. The sad thing was, it wasn't even funny, just a shameful example of how unscrupulous software houses. could be at the time. Thankfully, US Gold have gone on to be one of the biggest producers of quality software - pity it's not on the C64 any more!

Imagine accrued many brownie points on the release of their superlative arcade conversion. Green Beret. Although simplistic in terms of gameplay, it's horizontally-scrolling shoot-'em-up action was some of the best to hit the C64 during the year. With four levels to battle through, and a rather measly machete to do it with, it's platformorientated gameplay and varied enemies made it a hard game to forget. It's also one of the closest conversions released - almost everything the arcade machine had, it had too!

You should see the bit where he gets the flamethrower - cor, not 'arf. S'great.

Controversy raised it's all-to-familiar face when US Gold thed a new marketing tactic. The Legend of the Amazon Women was a rather insipid right to left scrolling beat-'em-up, with few moves and little in the way of Innovation or originality. However, the advertising campaign that went with it featured many scantily-

Domark's conversion of the popular Trivial Pursuits Spard game was as good as it could've paen. As well as offering musical and Visital questions (unavalible in the table-top. version), it was well presented, and the inevitable multiload, necessary to load questions was by no means as bad as you'd expect

However, Il didn't just require talent to succeed in the game - to play fairly, you needed to be honest. After answering a question, you were shown the answer and asked 'did you get it right?'. To code the various responses would've took too much memory, even on the 16-bit versions. I wonder how many people DID cheat ...?

Kikstart too.

Last month, I spent a paragraph or two extrolling the virtues of Mastertronic's Kikstart 2. A specia enhanced 128 version was released during 1986 with a grand total of 27 tracks (the original had eight), better graphics, sound and, subsequently playability. Possibly it's most impressive aspect was that it's twin disks retailed for a paltry £4.99 Hailed as the best 128 update at the time, it's an essential for any frustrated owner of the C64's bigger brother. It's a pity it's all but unavailable though...

The best 128 update ever? It's more than likely, as there's hardly any of the

Whereas US Gold had kept The Legend of the Amazon Women's sexual content to it's advertisements. Martech went one better and included nudity in an actual game. Samantha Fox Strip Poker was, by all accounts, a diabolical computer card game with a dubious licence attached. The 'digitised' pictures of Miss Fox in various states of undress were of questionable quality, and the £8.99 price was, quite frankly, a joke. As was commented in the reviews at the time, if someone wants to observe Sam's assets, they dibe better off popping to their newsagent to buy a copy of the Sun - incidentaly, for less than 30

Fairliaht Armospheric, isometric arcade adventure. What a disaster! Avoid like the plaque...

Melbourne House's Fist 2 - The Lagana Continues was no exception to the rule that sequels invariably don't maich their predecessors. Rather than expanding on the beat-em-up thems, the programmers decided lo incorparate a large exploritory element. Unfortunately, be it through lack of playtesting or bad design, Fist 2

> was an incredibly ledious game to play. The fights weren't as good as those seen in the first game, and they tended to be too few and lar between as well. Subsequently, most of your time was spent running around aimlessly. admiring bits of scenery and precious little else.

Like Green Bent, Ghosts and Goblins was an almost perfect conversion of the coin-op original. Looking and playing particularly well didn't seem to be arough for Elite (it's producers) - looking and playing exactly was far nearer the mark. An earth-strattering 97% was dutifully awarred, and even to this day. it's a stunning piec of software.

For those sick and tired of The Quill's limitations (If was a revolutionary piece of adventure writing hardware in it's time, but lacking come '86) Incentive's Graphic Adventure Creator provided a comprehensive solution. If you'd ever felt the need to put finger to keyboard and create a world of your own, then GAC (as it was known) was the utility to do if with. Reviewers of the time felt it's use relied on your commitment and skill, and, as such, lett awarding an overall percentage would be unfair. However, ZZAP! 64 did give il a Gold Medal (usually awarded to garnes of 95% and above), so, I'll let you draw your own conclusions...

Towards the end of '86, the Mekon's enemy the learless Dan Dare — made his eponymous C64 debut, courtesy of Virgin and much to the delight of our Managing Editor, Steve's raved abo it for as long as I've worked with him, saying how he spent weeks playing it and how it's one of the best arcade adventures ever. I myself beg to diffe as it seems a little crude, but Steve maintains that couldn't find my bottom with both hands and a flashlight, so who am I to know? Anyone willing to agree with me can write and tell Steve how wrong he is, but if you haven't seen it yet, it can be found on Beau Jolly's Big Box 2 compilation

Good update of an already-fine game.

Gremlin's Jack the Nipper was a particularly novel variation on the platform/arcade adventure genre. As Jack, you were capable of a mynag of different naughty tasks and dastardly deeds. These could be anything from breaking the computers in a high street store, to scaring the daylights out of cats. Novel and mesistible, Jack unfortunately suffered from awkward controls and, surprisingly, received average marks of 75%— a percentage I consider to be a little low.

Look, if I'd been naughty like Jack is, I'd be told off. Err, inspired caption eh?

Speaking of which, Entertainment USA's Ninja was 'awarded' an awful 25% by ZZAP! 64 reviewers — a mystery to me, as I quite like it! A beat-'em-up with poor graphics and even worse animation, it saw the player exploring and fighting, using assorted throwing weapons to complement moves such as tlying kicks, punches and other such offensive tactics. Your opponents were of varied skill levels too — thugs were strong, but stupid, whereas ninjas were a little more clued-up and would give as good as they got. The further into the game you'd get, the harder the opposition would become — and all for £2.99. Does anyone care to argue?

Piranha's big launch during the year. For those of you not in the know, the TV series told tales of Berk. Druft and Boney and their never-ending task of providing food for 'im upstairs. There was, also, the trapdoor — underneath which lived all manner of homble beasts and creatures. Their five-minute antics were made even more compulsive by the fact they were animated using plasticine, in a similar manner to that seen in the Creature

Comforts adverts — and the attention to detail was astounding.

The C64 game didn't disappoint. Played around the basement (and, of course, the trapdoor) there would be shouled commands for asserted food from Burk's demonic master. Taking Burk in hand, you'd have to caler (literally) to his employer's needs and whims — and all within a tight time limit. Like it's TV counterpart, it's most impressive aspect was it's visuals. Large, well animated sprites played a large part in creating the

games charm, and although the puzzles were occasionally too obscure, it was a darn fine game to waste time with

If you're looking for a few of these classics, perhaps dropping Capri Marketing a line would be a good idea. They've a fair selection of older games, and who knows? Maybe they'll have the game you want in stock. Capri Marketing can be found at:

look-back? Indeed, if the events of 1986 were good, then the year of '87 could only be described as better.

Make sure you don't miss the third instalment — only in next month's COMMODORE FORCE.

Not only does this month's REEL ACTION feature many excellent games, there's also a selection of quality PD demos for you to marvel EBUS takes a look at what's (in all but one case) on offer.

oy, do I have something for you this month! I've been rummaging through Ghostrider's collection, and discovered some excellent 'Onefiler' demos that you can see for yourself on the covertapes! So if you haven't done so already. load 'em up now!

A small tip for all you new demo fans out there - if you've seen enough of a section and want to proceed to the next, press the space bar, unless you're told to do otherwise. Easy, eh?

Pretzel Logic (Three Parts)

RETZEL LOGIC are a weird bunch (as weird as the name, I guess), but no matter what, they always come out with decent demos. Nylon Oxygen is no exception, with brilliant design and even better graphics.

After the initial presentation stuff, it's clear to

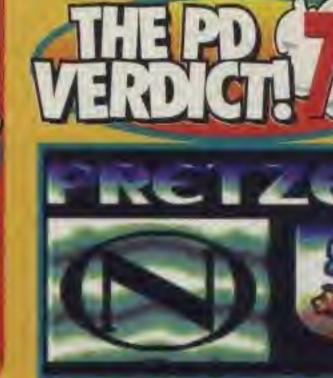

see that normality hasn't been invited. A big, colourful square pops up next to a shield with a fish on It - well strangel

Next comes a more downto-earth graphic - a simplistic logo accompanied by a scroller. It's cool, but not as brilliant as the main attraction which shows a

nice babe... er lady (I don't want to upset any female readers) sitting on top of a box with a great PRETZEL LOGIC logo painted on it. Below the box reads a funny scroll text in a highly detailed multi-functional scroller. But that's not all, as the logo disappears and a few moments later the screen changes to a room with a cute little baby playing in it. The youngster claps his hands and happily smiles away, but then, the little 'un transforms into a monster! Scary stuff, but fantastic to watch,

Nylon Oxygen is odd but the weird touches make it all the more original, and consequently.

a lot more exciting to watch. It only features three parts, but that's easily explained - the graphics use up a massive amount of memory.

Cosmos our Parts)

OSMOS has a very long and strangs history in the PD scene, If I'm right, COSMOS was formed in Austria, and became one of the better demo groups. But, when several members left to join after companies, the group started to die. Until, that is, they released several demos under the little COSMOS DESIGN, not from Austria, but from Holland (where else?). Unfortunately, they soon found themselves back in the same situation with very little inappening. A while later. though, things improved, resulting in several really cool demos, from Austria, involving some of the old members. Noiwadays, COSMOS **DESIGN** have become a commercial programming team, resiponsible for several games released by German software houses: Perplex must be one of the last demos before the 'lirst big silence' as IHEAMES, the programmer of this lot, claims that several members have just left ICOSMOS for 711.

Anyway, Perplex starts off with a small commercial, advertising a forthcoming democalled Einstein 5 (very cool but that's not the issue here). The first 'reial' section features a

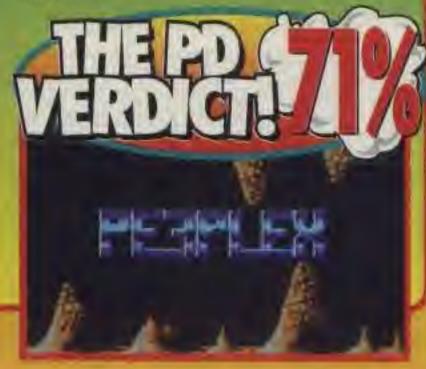

Pagiak loop outlineariem we rasiered ones which swith Mirough each other.

The mahr allracking follows a cave, in which agreeul Shange things happen; besides the

pocasional logo flying by, small volcance spit out lines which seem to have a mind of their own.

You'll have to be patient to see the last little. offenny, as if takes several minutes to decrunch, and can't be skipped by pressing epace. Last, but not least, three Perpley logos by about. around the screen.

Perplex is a very nice 'oneflier', with four, fairly different pans all handled in the great COSMOS. style. In the old days, you could see a lot of 'anefilers' with up to eight or ten sections, but they usually consisted of very boring raster. effects. Peiplex, however, has some nice visuals and ideas.

FUELIG DOWNING

BIGGENES DIOGENES

X-Ample (Two Parts)

-AMPLE are currently involved in game productions, mostly for the Amiga. During their days as a demo group they produced some high quality material, and the name X-AMPLE holds high esteem with many older scene members.

This small advertisement of their talents

teatures a nice
rorating 'X'
surrounded by
some X-AMPLEstyle graphics, with
text below stating
several interesting

tacts.

A graphic equaliser follows on top of a scroller and another X-AMPLE logo. As an added touch, pressing space reveals

the addresses of the group members.

The actual demo might not seem to be much, but even though it's small, it's still well worth your while.

CIRCLETAISTI

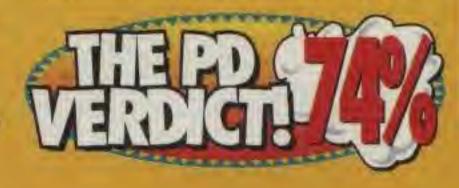

■ Bros (One Part)

withis is a real golden oldle, as it dates back a good six or seven years! But it's age doesn't seem to matter, as it's an all-time classic which can still knock seven stars out of many recent efforts. Made by the Danish group BROS (I believe a band copied their name. , or was it the other way around? Ahh, who cares?), this consists of only one section - but what a fine display it is. A big BROS logo is situated in the middle of the screen, with a circle of sprites swinging in front. At the top of the screen, a smaller logo slickly waves across. The loing on the cake comes in the form of two scrollers, one above the circles and one below, hence the name Circletwisi. The scroller at the bottom has something extra special; apart from the usual greetings, a little hand states which PD

groups are either cool, okay or a bunch of nerds!

With pumping music by Jeroen Tel (which Savage players will easily recognise) this demo has become a classic. Great design, great music and great ideas. Altogether, Circletwist is... er ...GREAT!

(...although unfortunately, COMMODORE FORCE readers won't get to see it on the covertapes. The basic content of the demo is great, but we can't allow naughty words and other such risque features (which Circletwist incorporates) to appear on Reel Action. Sorry! Ed)

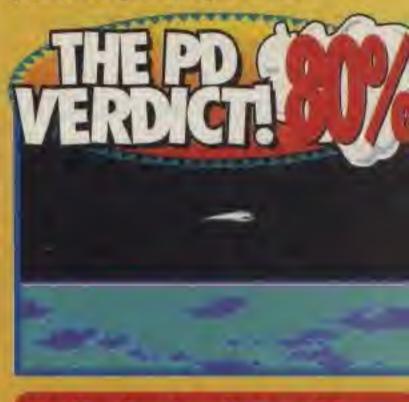

Rodgers (One Part)

ou can hardly call this a demo — it's nothing short of a small movie. With subtitles at the beginning and credits at the end, this is silver screen stuff and no mistake! Terminus is completely programmed, drawn, and composed by Drew Rodgers. Not a particularly famous person, but stardom

should be his as this is definitely one of my favourite C64 demos.

The story is short; a small space ship drops a medical unit to exterminate a virus on a contaminated planet.

Graphically and musically, no exceptional quality is achieved and the code doesn't feature any mind-boggling effects. But still, the sheer brilliance of the execution is superb. It's really hard to explain — so you'll have to see it for yourselves. I guarantee you'll love it!

Well, that's all for this issue's Public Domain. I'll be assessing my archives and contacting my connections to bring you more covertape demos for future instalments. And, if I'm in a good mood, I'll toss in some utilities as well!

Stay Public...

sun is baking a big pile of innards outside my door. The stench is unbearable, it's enough to make a barbarian vomit dogs. Then again, that smells even worse, especially when mixed with 14 tankards of mead...

further ado, let's get on with 'em

Kenneth Pedersen from Denmark wants to know how to get out of the bathroom in ZZZZ He's also having no end of trouble with harpies, Chiera and the Minoraur in Theseus And The Minotaur. Not only that, but he can't get the Daisies in Black Knight.

To get out of the bathroom in 2222 you first have to clean yoursell up a bit PUT PLUG IN BATH, TURN ON TAP, REMOVE CLOTHES, ENTER BATH, LEAVE BATH, TAKE BASKET, WEAR CLOTHES and at this point the conductor should enter and usher you out. As for Theseus. throw the bar at the Chimera, kill the Minotaur with the dagger and kill the Harpies with the arrows. In

Black Knight you should PICK DAISIES when a the village green location.

Daniel (The Mad) Drane of Gravesend wan to know how to get the wreath in Black Knight I 2, how to drain the take and where the axe is

Well, Daniel, if you find the old witch and take the staff she's holding, you can get through the standing stones to obtain the wreath. To drain t lake, you need to find a vine and lie it to the hai to make a long rope. Tie this to the branch belo the dam and, holding the other and, climb back to the top of the dam. Move West until you're standing in a safe spot and PULL ROPE. Once done, the axe will appear

Jennifer Allen wrote to me for help with Ven

l River Software, £2.95 casselle or disk

Many people are fond of dragons and all things mystical but are just too shy admit it. However, a certain barbarian is anything but bashful...

s promised last issue. I'm going to take a look at another excellent adventure from the Jack Lockerby/River Software stable. This particular game appealed to me because it contains lots of magic, spells and so forth. I suspected if was going to be vasily entertaining even before I started playing - I wasn't

disappointed

You're an apprentice sorcerer, desperate to become a fully fledged member of the sorcering fraternity. The training has been long and hard, and you're filled with excitement and trepidation. When the momentous day finally arrives, you're called upon to take the final test - entering the Enchanted Cottage. If you manage to solve all the puzzles and leave the cottage, your dreams will come true and your ambition to become a true sorcerer will be realised. You're provided with some useful spells but it's up to you to discover how to utilise them.

After starting the quest, there's only one way out from the cottage - three keys need retrieving to open a single door. Use these in the correct order and you should emerge triumphant!

The first location in the Enchanted Cottage is a single room, containing the infamous door to the outside world, and a strange, colourful cube. The initial problem with the cube is quite gentle, and designed to coax the apprehensive adventurer

along. If you manage to solve the puzzle there's plenty of help to guarantee this - you encounter three different-coloured spinning discs which, when jumped upon, transport you to three different scenarios, each crammed with locations to explore, problems to solve and obstacles to overcome.

Cottage Pie

Travelling between each different section is quite straight forward, which is fortunate, as many objects found in one area are needed in another

There's enough within this to keep the most demanding adventurer happy. Puzzles are abound at every turn, and these range from the simple, right up to the damned difficult. Thankfully, Jack has included a useful help routine to offer advice with the tougher puzzles. so you shouldn't become loc bagged down. In addition to this, careful examination of everythin can often prove invaluable.

and Theseus but didn't enclose an SAE. If you'd like to tell me exactly where you are stuck, Jenny. then I d be happy to help.

Ann Castelow of Cleveland is asking which adventure creating utility I prefer, and how to go about getting hold of either PAW, GAG or QUILL Witch Hurt is also giving Ann a bit of gnet - she can't get the nails from the well. Also, in the wooden building, she can locate something on the beam but can't collect it

I have to admit that I prefer GAC, as it's easy to use and, best of all, still available. Check out The Guild as they're offering GAC as PD for just £1 you can't say fairer than that. In Witch Hunt, you can get the nails from the well if you WAVE BAR (it's magnetic). In the hut with the beam, the input you need is SEARCH BEAM followed by FEEL BEAM You'll pull a lever to open a trapdoor.

Mr. J Reidy of N Ireland is teaning his hair out he's fed up of being used as a pin cushion by the archer in Veriom.

The answer to this problem is one of timing really. Make sure you do the following when emerging from the cave: Mount the horse and go east twice into the river, where your house will be shot (poor blighter). If you fall to entier the river on horeseback within those three moves more bullets will fly. Go due south and then west until you reach the Inn - you should be alright

DJ Johnson of Newton Abbot is stuck on one of my favourite 'Golden Oldie adventures -Snowball. It's the east/west corridor near the end of the game that's posing a problem - in

Enchanted Cottage has been out for a couple of years, but is miol one to be missed from your collection. It's text only - in my opinion, the best type off adventure is one in which you use your own imagination to Illustrate it - and is written by a most competent author who rreally knows his stuff.

Lusually make a note; when reviewing an adventure whether it's scullable for beginner's or more experienced addventurers. In this case, I can honestly say it's suultable for ALL. The Enchanted Cottage is a I most enjoyable romp, with plenty to see and doo to keep you happily occupied for a long times.

particular, the laser located in that area.

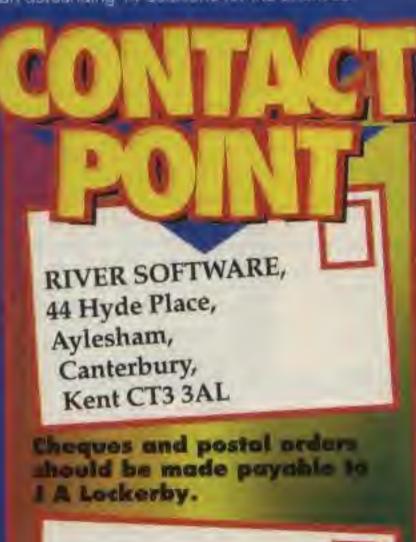

If you WAVE TRAY (the one that had the electo-flute on it) the lazar beam will be reflected. back onto itself and explode. It's now safe to DASS

Sharon Lockhart of Huddersfield writes Tim fairly new to adventures, and have only been playing them for a year. I've been wondering, where did it all start?

Indeed, Sharon, adventure games have an interesting history and the first was written by two gentlemen, Crowther and Woods, It was called not surprisingly - Adventure It wasn't long before a huge number of people wrate their own 'versions' and marketed them. Among the 'onginal' clones were Colossal Cave. Classic. Adventure The Seri's Tale and many more, as well as plenty of spoofs such as Very Big Cave Adventure. The public soon became hooked and lots more adventure material followed, such as ZORK 1 Ahn, those were the days! How many other, long-time adventurers fondly remember the little brick building at the northern and of the lush valley which was a well-house for a spring?

Keep on writing and please don't torget to enclose a stamped, self-addressed envelope II you'd like a personal reply. More letters next issue.

Special mention must be given to the following reader's who've proved to be outstanding in their efforts to help fellow adventurers by sending solutions, hints and tips for the column: Kenneth Pedersen of Denmark, Luke Croll of Sheemess, J. Reidy of Antrim and last but by no means least. Damian Steele of Paignton, Devon who sent in an astounding 14 solutions for the archives!

THE GUILD, 760 Tyburn Rd. Erdington,

Birmingham B24 9NX.

Chaques/Postal orders should be made payable to Glenda Collins. Kenneth Federsen very kindly sent in the following tips: BLACK KNIGHT PART 2-If you can't get past the leopard view it from different angles! SEABASE DELTA - Need a seg/ Stand in front of the hen and CHEW GUM, BLOW BUBBLE The Sandman will giv you wall it you type THUMB LIF (not UFT THUMB), but remember that you must press **HETURN** when you can SEE th Sandman. I received a list of Tony Collins' new Public Domain Library of adventures, from The Gulld, and what an impressive list it is. Tony is offering a compilation of four adventures from an impressive list of aroun 150 titles, on one disk or tape for Just £1.50! He also has another 70 odd titles costing just £1 ead and The Graphic Adventure Creator is one of them! So linere's absolutely no excuse to not trying your hand at creating your own game! I advise you to

So with a flash of my swo and a curdling cry, I'm of to sort out the elves from the dwarfs. Keep writing and remember - the bigger the sword, the bigger the bloodshed.
